Resumen: (traducción alternativa)
The upper section of the Gorduno has some beautiful features, though unfortunately they are interrupted by long walking passages.

Hidrología: (traducción alternativa)
It's a medium-sized watershed, but there are some very narrow sections in the stream, so you shouldn't go in with too much water.

Acceso: (traducción alternativa)
Below, you can pay the toll using Twint for 7 francs.

Acceso: (traducción alternativa)
Park at P.1160, and walk from there to Pián d'Arnè. From there, head downhill cross-country until you reach the trail at 1000hm, which is no longer visible. Follow the old track through the steep cliff face to reach P.935.

Recorrido: (traducción alternativa)
The route has a few rappels right at the start, but then there’s a long stretch that, while it has some cut-ins here and there, is full of boulders to downclimb. It’s not until you round the hill at P.717 that polished rock reappears. There’s a really beautiful narrow section there, where the final rappel should not be underestimated when the water level is high.

After that, the stream becomes less exciting again. The water disappears completely in some places, and you have to downclimb boulders for several dozen meters before the terrain flattens out again and you reach the entry to the Inferiore.

Regreso: (traducción alternativa)
Either continue on the Inferiore, or take its access trail in the opposite direction.

It's okay once in a lifetime. It's a shame that many of the vertical parts of the route are just boulders you have to downclimb. But a few spots are really beautiful, and I've never seen water this golden before. (traducción alternativa)
