Resumen: (traducción alternativa) Easy and relatively short gorge. Very easy to find.		
Hidrología:		
Acceso: (traducción alternativa) A8 to Inntaldreieck, then A93 to Kiefersfelden. In the village turn west and follow the signs.		
Acceso: (traducción alternativa) Follow the signs for "Gießenbachklamm". After about 30-40 minutes, descend under the bridge in front of the dam wall.		
Recorrido: (traducción alternativa) Easy and relatively short gorge. Beautiful in the morning as the sun shines in from the east. Very easy to find, signposted from Kiefersfelden and marked on every hiking map. Scenic and formations very beautiful. 3 very short places for slides, 5 very short and easy abseils, 4 small jumps possible. Description and rating here applies to low water. Much more difficult at high water and belays partly under water. There is a small dam above the canyon. When water is released, the water level can rise quickly (water surge possible). The gorge is also used by tour operators. A 15m long rope is all you need.		
Regreso: (traducción alternativa) You leave the gorge behind the small power station house. You can also walk into it from below.

Made after the middle section. Very slippery, deep pools. (traducción alternativa)

Easy tour along the trail which is frequently used. You may get some cheers along the way. Some jumps/slides possible but requires checking. Two last jumps ok. Stands fine. Recommended to connect with mid part.

Hiked in the morning together with Gitti and Arthur. A nice little tour without any special features. The ropes could not be pulled off from below twice when the button was threaded the wrong way up against the chain link. (traducción alternativa)

We made a few jumps, some of the anchors are a bit rusty, but everything is fine so far. Together with the middle Gießenbach, the ascent is a bit more worthwhile :) (traducción alternativa)

All good, pools are deep again

2024-07-14 | Montie | ★★ | 📖 | 📍 | ⚓ | 🌊 Normal | 🍏 Completado

All pools are unfortunately filled up completely. Max water depth is about knee height. Most of the jumps and slides are off the table for now.

Anchors are good, pools deep enough to jump. Water level hardly ever an issue in the lower part due to the dam.

Again encountered 2 commercial groups who kindly let us pass. (traducción alternativa)

Very many hikers (parking lots and road completely parked), middle gump deep enough to jump (do not jump too far ahead!), also final gump deep enough. (traducción alternativa)
