Cuerdas: 2x 20m

Resumen: (traducción alternativa)
A short rappel canyon with 2 slides and 2 jumps.

Hidrología: (traducción alternativa)
The water level can be observed at the exit or at the entry to the weir.

Acceso: (traducción alternativa)
We drive to Anfo on Lago d'Idro and park our car for the exit in the square in front of the church. With the second car we drive north on the main road SS237 - Via Roma - for about 350m towards Storo and then turn left on Via S. Petronilla towards Passo Maniva. We go up 2 switchbacks, then go through another right turn and then park our car near the church Chiesa di Santa Petronilla (cf. sketch at http://www.canyoning.it/procanyon/re.htm).

Acceso: (traducción alternativa)
Now we take the footpath that begins in the next left turn. After about 50m we keep to the right and quickly come to a concrete footbridge. If we only have 1 car available, we can also head for the entry from Anfo on this path, cf. http://www.canyoning.it/procanyon/re/PlanimetriaRe.pdf

Recorrido: (traducción alternativa)
We enter the water slightly above the concrete path. 4 rappels; after the first rappeller descends from the weir, there are 2 slides and 1 jump. Be sure to check out the pools! For the first one (15 m), using a belay point is recommended. A belay point is also advisable for the third rapper. Shortly after the fourth rappel, there’s another 3-meter jump from a rock ledge on the right. Then we reach the first houses of Anfo. Almost in the center, we exit on the righthand side at the last major pool before the riverbed begins to be reinforced.

Regreso: (traducción alternativa)
To the church and to the car.

Coordenadas:
Inicio del Cañón 45.7683 10.4884
Final del Cañón 45.7665 10.4909
Aparcamiento a la entrada 45.7693 10.4900
Aparcamiento a la salida 45.7665 10.4913

We used the parking lot under the church because the one right by the exit was full. Please just walk up for 10 minutes—no need for a shuttle! AIC Raduno (traducción alternativa)

Chain anchors in good condition, some exposed. The canyon offers relatively good grip, with few slippery spots. Anchors available for higher water levels. 1 slide and 2 jumps possible. More than 4 rappellers. To be updated. Beautiful, weathered limestone. Stunning scenery in the canyon. Caution on the slide!!! At higher water levels, a rock approximately 20 cm below the water’s surface forms a churning pool, and the slide consequently creates a potentially deadly backwash/tumble. Image for water level check—low water level: (traducción alternativa)
