Especialidades:

Equipo:
Cuerdas: 2x30

Resumen:
U-shaped mini-canyon with 7 abseils and good flow throughout the year. Only interesting as collector's canyon when you've done the nearby Nucci, Susanna, Ciorosolin, Stuet, Pes, Meda, Spessa...

Hidrología:

Acceso:
Park the car (or bike) at Gobo bridge.

Acceso:
Just before Gobo bridge leaves a trail on our right (river left) which crosses the scree at first (don't climb up before having crossed the scree), then climbs faint, nearly inexistant through grass and by the end some bushes or trees, descend the side river to the confluence and start of the canyon.

Recorrido:
Surprisingly well bolted, mostly M10 and doubled, AIC mentions 35m max but this is the total waterfall. Mid-way there is a mid-belaystation, which is more like 25m.

We added new anchors today. The canyon is now significantly safer and better equipped than before. (traducción alternativa)

Approach on well-trodden track. From the Gobbo bridge from the clearing for three cars climb the left bank of the Settimana (cairns present and DO NOT climb up the scree) until you find the grassy track that climbs steeply all the way up the left side of the Piovin. (traducción alternativa)

Still plenty water this time of year. Easy bike-ride from Claut while checking flow in nearby canyons Susanna & Nucci. The approach however is short but not easy. Read description well (avoid the scree at all costs).
