| Resumen: Vertical, continuous and not too aquatic, Susanna makes for a great canyon in Spring or when other canyons have too much water. Together with Nuccí it is one of the most recent interesting tours in the wild Dolomiti Friulane (Sept. '23). The approach is on a hunter's trail, marked with blue dots, east-facing, morning sun obliges. | | |
| Hidrología: Susanna has a small water catchment area, therefore depending on rain or snowmelt. Water flow can be checked easily from the road: we see from down to up: the c40, c60 & c76. | | |
| Acceso: Claut - Valle Settimana - park by Stalle Susanna (first barn on the opposite side of the river Settimana), marked by a road sign. From June-July to the 3rd Sunday of Sept. there is a road fee, payable in cash or card at the entrance of the valley. Note, there have been landslides after prolonged periods of heavy rain, mostly further upstream. Susanna & Nuccí are two canyons that are an easy mountainbike-ride from Claut (can be rented locally). | | |
| Acceso: Cross the main river on a wooden bridge slightly upstream from the parking. On the backside of the barn (Stalle Susanna) is an ancient oven, and start of a trail towards the canyon on our right. Well before reaching the canyon, blue markings by a little junction indicate we go left & up, immediately confirmed by another blue marking on a small pine tree. This trail is now faint, but marked with blue dots and the occasional cairn, it zigzags its way up through the trees and brings us closer to the canyon. At this point we are on the final emergency exit/entrance to the lower part, but we continue up on our left, steep and at times not so clear, but always marked. The trail uses the forest on the ascending ridge (offering great views and occasional phone reception) towards the final chimney 'Col Della Question'. Up on the chimney we continue shortly straight, then rapidly descend towards Susanna on our right (blue markings lead the way). A higher entrance exists but offering little reward with only 2 more obstacles won. | | |

Beautiful lonely tour. All anchors ok. Low water level despite heavy rain in the evening and morning before the ascent. Access wild but well marked. Overall a great continuous rappel tour with only one walking passages in the lower third and nice high rappels. If there is a lot of water, it could be difficult to reach the exposed belay here and there. (traducción alternativa)

The canyon is very beautiful, well worth a visit. The description is problematic: the uphill is 2:10, the canyon is more like 5 hours. The stands are in good condition but poor. The way up is well marked, only a few places were difficult to follow, however it is very steep and sparsely travelled. The described turnoff on the path to the canon is just before the KPE pipe used to bring water to the farm house. (traducción alternativa)

Beautiful alpine hike. We hiked it for about 2 hours, still well marked. And the canyon took us 6 hours with four people. The rope got stuck a couple of times :D. All anchor points were ok. Long and demanding, but beautiful
♡♡♡.

Wonderful alpine tour! Strenuous but well-marked access; all anchors in good condition. Safe to walk even after/when it rains. (traducción alternativa)
