Cuerdas: 2x20m

Resumen: (traducción alternativa)
Alpine canyon, lower part, narrow throughout, usually lots of dead wood, smaller rappels

Hidrología:

Acceso: (traducción alternativa)
The starting point is the village of Griesen in the Loisach Valley on the Garmisch-Partenkirchen - Ehrwald/Lermoos connecting road. The village is located about 1200m northeast of the German-Austrian border. Parking is possible on both sides of the bridge.

Acceso: (traducción alternativa)
We start east of the bridge over the Neidernach, which flows into the Loisach a few meters below. We take the forest road on the orographic left bank of the Neidernach and hike upstream, past a field chapel. We cross the Nudelgraben and the Sunkenlaine. 1000m after the start of the path and 140m after crossing the Sunkenlaine, we turn right onto rough vehicle tracks in the mire (two small signposts without inscriptions on trees in diametrical directions). We follow the "path", which later becomes a path, uphill. At 950 m above sea level, the path branches off. Turn left (signposted "Schellalm"-"251") and in a few meters you reach the footbridge over the Schellaine. For entry, from the 3rd leftward haipin bend, we carefully rappel from tree to tree over into the streambed.

Recorrido: (traducción alternativa)
Smaller rappels, several downclimbs over deadwood.

Regreso: (traducción alternativa)
Follow the streambed to the forest road and return on it to the parking lot.

Coordenadas:

Very overgrown. As described, descend into the canyon after the third leftward haipin bend past the bridge. Can be done without ropes. However, there are no markings or trail traces. (traducción alternativa)

Everything is in order. We have set two new anchors in the lower part. (traducción alternativa)

A fantastically beautiful canyon. Mostly only one anchor, of which some anchor points are in questionable condition. Partial rappel from dead wood. I cannot recommend the access (so far) given in the description for the last few meters from the bridge - it would be life-threatening! Better to carefully abseil down from the trees in the 3rd leftward haipin bend after the bridge. Video link to the tour: https://www.youtube.com/watch?v=Gl_O25x08j8 (traducción alternativa)

At the beginning it looked like the stream was dry, but it disappears further up in the streambed. We chose an access one bend further up, all hooks are still there, hooks are firm but rusty, a lot of wood, could be problematic at higher water levels. (traducción alternativa)

2023-10-21 | Wolfgang Streicher | ☆ ☆ ☆ |🕮 |⚓ ★ ★ | ≋ Bajo | 👍 Completado
At the somewhat tricky traverse from the climb into the creek bed handrail attached. Hooks ok. Predominantly sunshine in the gorge. Ideal entry time would be 11.15(summer time) in this respect. Deadwood not a problem at this relatively low water flow. (traducción alternativa)
