País: Schweiz / Switzerland **Región:** Kanton Obwalden **Subregione:** Lungern **Ciudad:** Lungern		
Dificultad: difícil	**Grado:** v5 a3 IV	**Tiempo total:** 3h35
Tiempo acceso: 30min	**Tiempo tour:** 3h	**Tiempo regreso:** 5min
Altitud de entrada: 1250m	**Altitud de salida:** 1010m	**Altitude delta:** 240m
Longitud del cañón: 1450m	**Rapel más alto:** 140m	**Cantidad rapells:** 6
Transporte: Coche opcional	**Tipo de roca:**	**Zona de entrada:** 4.00km²
Temporada: mayo - octubre	**Orientación:** Noroeste	**Mejor época:**
Clasificación: ☆ 0 ()	**Información:** ★ 0 ()	**Belay:** ★ 0 ()

Especialidades:

Equipo:
Cuerdas: 2x 110m

Resumen: (traducción alternativa)
Short canyon with c105 which is partially free rappel.

Hidrología:

Acceso: (traducción alternativa)
On the Brünigpass road in Lucerne, take the Lungern exit and head towards Turren Bahn (Industriestrasse). At the large parking lot, turn left into the 1.4 km long studenstrasse, which runs on the right-hand side of the river.

Acceso: (traducción alternativa)
2 solutions from the parking lot:
-Either take a mini-shuttle and take the cable car to the Turren cable car. From the cable car, take the path that branches off the road, 500 m further on and then (1570 m above sea level) take the path to the left and descend on the hiking trail to the altitude of 1310 m above sea level. From there, descend as best you can to the stream. At the exit, it can be useful to rappel down a tree to reach the streambed. Approach 40-50 min without shuttle bus or cable car.
-Either take the hiking trail, which crosses the stream after 50 m and then climbs up in serpentines to the right. Ascend to an altitude of 1310 m. From there, descend as best you can to reach the stream. At the exit, it may be useful to rappel down a tree to reach the streambed. (535 m difference in altitude approx. 1h30-2h).

Recorrido: (traducción alternativa)
The canyon starts with some waterfalls, then you come to a nice C25 in a half tube, another C8, a small T2 and you are at the top of the C140.
We descended from a tree from RG (sling created). A length of 40 m leads to a relay offset to RG (better rock quality and you avoid falling rocks). From there we moved directly down with a length of 105 m, but it would be possible to drill a relay to avoid friction at -20/25 m.
Rappels of the rope not complicated. The lower part of the descent (the last 50 m) is done in the water when the wind pushes the waterfall in that direction.

No easy escape routes, water is avoidable.

Regreso: (traducción alternativa)
Further in the streambed at best (30-40min) blocks.... You find 2-3 quite nice passages that you have de-escalated, then you leave the creek at the footbridge, the car is 50m away.

Coordenadas:
Inicio del Cañón 46.7802 8.1210
Final del Cañón 46.7781 8.1361
Aparcamiento a la entrada 46.7861 8.1230
Aparcamiento a la salida 46.7778 8.1371
