<b>Resumen:</b> (traducción alternativa) Vertical rappel canyon with a spectacular ambience		
<b>Hidrología:</b>		
<b>Acceso:</b> (traducción alternativa) From Seixal, drive south on the ER221 towards Chao da Ribeira, follow the road to the exit, then continue on the dirt road to the fish farm. Park here.		
<b>Acceso:</b> (traducción alternativa) In the same direction, follow the initially wide, later narrower path, cross the dam on the right and continue through the forest until you reach a wooden sign "Vereda dos Barbinhas". Cross the river Seixal here and look for the faintly recognizable path opposite (cairn). Climb up the steep wall until you reach the Levada do Seixal. Change here (there is no room for this at the entry point!) and then walk to the left for a few minutes to the entry point.		
<b>Recorrido:</b> (traducción alternativa) The first step can be rappelled down a small tree, downclimbing is often tricky because the rock is very slippery. From now on, abseiling point follows abseiling point, and after three waterfalls, the two high Multipitch waterfalls are already waiting. If you don't miss the intermediate stands, you can work with 40-meter ropes. After a spectacular series of three high abseils, there is a short break to catch your breath before the next exciting passage is reached. This is also the only really deep pool on the tour. The tour then comes to a relaxed end with two short abseils. After the last rappel, a path leads off to the left.		
<b>Regreso:</b> (traducción alternativa) Follow the narrow path that leads back to the access. Cross the Seixal and return through the forest to the car.

A good alternative if the surrounding canyons carry too much water. (traducción alternativa)

Automatisch importiert von Descente-Canyon.com für Canyon Vimieiro Debit normal, tout l'équipement est en place et de bonne qualité. Le seul bémol est l'approche raide. (Quelle: <https://www.descente-canyon.com/canyoning/canyon-debit/22106/observations.html>)

Automatisch importiert von Descente-Canyon.com für Canyon Vimieiro La levada au-dessus du canyon est entièrement réparée, le débit d'eau est normal à faible. Grâce à trois nouveaux ancrages chimiques, la dernière grande cascade peut désormais être effectuée en toute sécurité. L'état de l'accès escarpé se détériore malheureusement d'année en année, mais il reste praticable. (Quelle: <https://www.descente-canyon.com/canyoning/canyon-debit/22106/observations.html>)

This canyon felt a bit overrated to me, not as charming as many comments suggest. R4 and R7 can be skipped easily, and R12 also tempts so but here it is not recommended for pulling down from R11 is quite a struggle. R13 is bomb-proof now.

Automatisch importiert von Descente-Canyon.com für Canyon Vimieiro Petit canyon sympathique, un glissement de terrain récent sur la fin du canyon. Une corde en fixe (+/- 5m) au centre du canyon a cet endroit permet la dernière descente, probablement placée après le glissement de terrain. Anchor point 13 gets worse and worse - but still ok. Before the last anchor: landslide with many fresh trees in the creek. good passage, but anchor undamaged. Take a handsaw with you on the next ascent and clean up a bit ;) (traducción alternativa)

Automatisch importiert von Descente-Canyon.com für Canyon Vimieiro Debit d'eau entre correct et gros. Un pur plaisir après une montée raide. Les cascades se succèdent, toutes plus belles les unes que les autres. Automatisch importiert von Descente-Canyon.com für Canyon Vimieiro Un peu surcoté à mon goût mais le caractère vertical du canyon est sympa (Quelle: <https://www.descente-canyon.com/canyoning/canyon-debit/22106/observations.html>)

Short and quite vertical. A lot of vegetation inside. Rather stream in mountain than a closed canyon. (traducción
