Cuerdas: 2x25m

Resumen: (traducción alternativa)
Short rappel canyon in settlement area

Hidrología:

Acceso: (traducción alternativa)
From the 4-lane road that (coming from Bellinzona) runs towards Locarno, we turn off at the Tenero (Locarno) exit, turn left after the railroad underpass and after a right turn we come to a traffic circle, which we leave again in the original (northern) direction. Near the church that now towers in front of us, we look for a useful parking place.

Acceso: (traducción alternativa)
From the church we follow the road going up to Contra 150 m and then turn right onto a footpath. This crosses the road again, then our stream (informative low view of the final waterfalls) and then goes up on the orographic. right side of the stream. In the process, it tangents twice more road serpentines (the second time a few meters on the road to the right) before it goes up in a fairly straight line. Where the view of the stream opens up on the righthand side, we find the access.

Recorrido: (traducción alternativa)
Sequence of rappels in a gorge in the settlement area. Can be attached to another tour to round off the day and combined with a visit to Locarno. Useful also when other streams have too high water flow. Nearby Carcale, Verzasca, Pesta and Cugnasco.

Regreso: (traducción alternativa)
After the final waterfall out onto the road and on it left to the church.

Coordenadas:
Inicio del Cañón 46.1849 8.8436
Final del Cañón 46.1821 8.8453
Aparcamiento Entrada y Salida 46.1809 8.8486
Medidor de nivel de agua 46.1816 8.8456

Nice atmosphere and a canyon that’s perfect for ending the day. When the water level is moderate to high, this canyon can be quite interesting. The natural anchor at the final waterfall was also omitted. Otherwise, the remaining anchors are in good condition. (traducción alternativa)

2026-09-06 | Tom Holz | ☆ ☆ |🕮 ★ ★ ★ |⚓ ★ | 𝌆 Seco | 👍 Completado
The water level is very low and the flow is slow. The platform at the last set of steps by the tree stump is in extremely poor condition. The tree is rotten and unsafe. We therefore got out of the water. (traducción alternativa)

Contrary to the description in Eldorado Ticino, this is not just an alternative tour. Great ambience in jungle-like surroundings and great light conditions when the sun shines through the trees from midday. The stream is clean. Last chain anchor at the C18 is only half intact. (traducción alternativa)

Did the stream on a hot day with a low water level. Luckily it was shady □□ the anchors were good. We got off at the last bridge before the last rappel. The stand there is attached to a tree trunk with several ropes. It basically makes a good impression. (traducción alternativa)

Automatisch importiert von Descente-Canyon.com für Canyon Tenero AttentionUn des points de l'amarrage de la c18 bouge. Prévoir un marteau pour enfoncer le gougeon et une clé pour le refixer.Beau petit canyon à faire quand les autres ont trop d'eau. (Quelle: https://www.descente-canyon.com/canyoning/canyon-debit/22079/observations.html)

Water level rather more than a reference picture but easily doable. Some of the stands are a bit outdated but ok. Beautiful individual passages□□ (traducción alternativa)

Slippery to walk but quickly doable again after two days of rain. We didn't do the final cascade as the anchoring is really no longer good. Please take a drill with you next time. The canyon is superiore accessible by public transport from e.g. cugnasco. (Upper station "zotte") (traducción alternativa)

A lot of water - one of the few canyons in Ticino that was possible today. The anchoring of the last cascade is very poor. Video: https://www.youtube.com/watch?v=tVsCZEuy5Gs Photos: https://www.christian-balla.de/Tenero (traducción alternativa)
