País: España / Spain **Región:** Canarias / Canary Islands **Subregione:** Las Palmas **Ciudad:** Soria		
Dificultad: difícil	**Grado:** v5 a3 III	**Tiempo total:** 4h40
Tiempo acceso: 1h30	**Tiempo tour:** 3h	**Tiempo regreso:** 10min
Altitud de entrada: 900m	**Altitud de salida:** 640m	**Altitude delta:** 260m
Longitud del cañón: 500m	**Rapel más alto:** 60m	**Cantidad rapells:** 6
Transporte: Coche opcional	**Tipo de roca:**	**Zona de entrada:** km²
Temporada:	**Orientación:** Sureste	**Mejor época:**
Clasificación: ☆ 3.1 (2)	**Información:** ★ 0 ()	**Belay:** ★ 0 ()

Advertencias:
Piscinas secas: Caldera trampa (Marmita trampa)
Piscinas que no tienen agua o cuyo nivel no llega al borde de la piscina. Por lo tanto, salir puede ser imposible o, al menos, difícil.

Especialidades:

Equipo:
Cuerdas: 2x70m

Resumen: (traducción alternativa)
Rappel canyon with "run up"

Hidrología: (traducción alternativa)
Marmita Trampa !

Acceso: (traducción alternativa)
On the GC_1 from Maspalomas to Arguineguin. After leaving the GC_1 there and driving towards the center of Arguineguin, change at the next exit to the east side of the valley and drive on the GC_505 in the valley of the Barranco Arguineguin northward and up to Soria (670 m a.s.l.).Through Soria and on the tarred little road further about 1.5 km slightly downhill until the road crosses the streambed of the Bco. Above the road the basin with the second high rappel. Here you can leave your car and shuttle to the other side. Either over a slope (for normal cars just still drivable), which leads in extension of our access road up to the GC_605, or back over Soria and up to the Embalse de Cueva de las Niñas, along its northwest slope, until one reaches the road junction at the exit of the reservoir (970 m a.s.l.), where one can approach the dam wall on the tarred road closed with barrier (cf. Internet finding place 'gpswandern').

Acceso: (traducción alternativa)
Return from the car on the tarred road and after about 300 m turn right onto the dirt road that joins at an acute angle. Follow this uphill for around 20 minutes until you reach the large basin, cross it and look for the rest of the hiking trail on the opposite side. After passing the rock faces, the path heads up towards the ridge. It reaches the tarred road (signpost in the opposite direction 'Soria'). Follow this road to the left in a southerly direction for a good 20 minutes until you reach the houses at the dam wall (see 'gpswandern' internet location). Before the houses at the dam wall, descend southwards to the Barranco, but do not enter immediately, but continue along the stream for about 10-20 m above the stream, later on a water pipe, until you can descend - as late as possible - into the streambed.

Recorrido: (traducción alternativa)
First "children's canyon", then a sequence of several (6) partly high rappels into a large rock cauldron. In the upper cauldron you can either rappel orographic left (70 m to the small pool, then 25 m to the large pool, 12 m after the large pool) or right (estimated 50 m to the intermediate belay on the ledge and from there an estimated 45 m to the large pool) The lower cauldron has a height of 70 m and can be broken after about 20 m, but will not be everyone's cup of tea due to the exposed nature of the intermediate belay.
Depending on the water flow, the large pool can become a Marmita Trampa (drainage below the water surface!), from which you will have great problems when climbing out.

Regreso: (traducción alternativa)
Down to the road and to the right there to the car.

Coordenadas:
Inicio del Cañón 27.9192 -15.6712
Final del Cañón 27.9161 -15.6692
Aparcamiento a la entrada 27.9310 -15.6578
Aparcamiento a la salida 27.9160 -15.6690
