Especialidades:

Equipo:

Resumen: (traducción alternativa)
First aquatic rappel canyon "from one cast" in basalt, then run before the 100m step into Bras Rouge

Hidrología:

Acceso: (traducción alternativa)
In Cilaos, in the Cirque (basin) of the same name, we park our car for the exit where the connecting path from the hamlet of Ilet à Cördes comes up from the Bras Rouge valley.
From Cilaos, we then take the 2nd Autödie D 242 via Ilet Dijoux and continue in the direction of Ilet à Cordes. After 4.1 km we cross the Bras Rouges and after about 7 km (from Cilaos/junction D241/D242) we come to the bridge over the Fleurs Jaunes. Park your car here.

Acceso: (traducción alternativa)
From the bridge we walk about 350 m in open terrain, orienting ourselves to the left along the stream to the first abseiling point.

Recorrido: (traducción alternativa)
This is followed by 7 to 9 rappels (depending on any breaks). You can sometimes cut the ropes so that you slide out of the rope from a certain height and fall into the pool below. The highlight are the 2 longer chutes at the exit of the tour described here, starting with the C55, which can now also be broken. After the 3 successive rappels mentioned above (55 m, 35 m, 20 m), we climb down a few more meters over boulders.
During the descent, views of the impressive scenic landscape constantly open up.
Then there is a possible exit up a steep chute ('Jacomedie') to the rocks of Marmailles and from here over a ridge up to the viewpoint on the road. From here, follow the road in a westerly direction back to the car.
The integral ascent takes us about 850m or 1 hour down the left bank of the stream to the "dalles", which are pools of a larger and almost flat granite surface before reaching the Bras Rouge. The route now descends almost vertically for around 100 meters.
Once at the bottom, the gloomy "Chapelle" awaits us at the exit of the tour.
Alternatively, you can rappel directly into the chapel through the split block, but then you need at least 1x100m ropes + 1x60m + 1x40m, see topographic view.

Regreso: (traducción alternativa)
From the "Chapelle" a few hundred meters downstream, then we take the footpath up to the left. An intermediate descent of almost 100 meters of altitude brings us down to the footpath of Ilet à Cordes. On this up to the road in Cilaos, where our car is.

Coordenadas:
Inicio del Cañón -21.1305 55.4463
Final del Cañón -21.1339 55.4548

Automatisch importiert von Descente-Canyon.com für Canyon Fleurs Jaunes Beautifully shaped and continuous first section. A long walk until the "salle a manger" and then a very nice drop into "la chapelle". The first drop (along fleur jaunes itself) seems less interesting. Then there are 2 options along the side: onto the block (we took this one - very nice and well equiped). There is a third option further on along the edge. For this i think you'll need a longer rope then 100m - not sure though. Be careful throwing down the rope as there are many tourist below (Quelle: https://www.descente-canyon.com/canyoning/canyon-debit/20916/observations.html)

Automatisch importiert von Descente-Canyon.com für Canyon Fleurs Jaunes To find the right anchor for the 95m rappel of la chappelle:When you arrive at the brass roughe rake a little path to right, on the edge of the canyon. Follow for +-70meter, take the first anchor R10 + R30 to the big bloc. On the block go to the left, to find the big chain anchor for the beautiful R95.
