A new landslide has been reported in the third and final narrow section, so it is best to bring climbing gear to complete the descent. (traducción alternativa)

Long alpine canyon, that is more discontinuous than nearby Susanna or Nucci. To bring the security closer to standards we had to add many anchors, doubled or made redundant a lot. Good to know there is one obligatory toboggan of +-10m and another obligatory jump in the final part. In between there is a long and testing walk/downclimb along a landslide and boulders. We entered 1400masl+- through a larches field (pretty straightforward). There is room for some 4, maybe 5 additional anchors. Also thanks to the previous team for their work. There is still quite a few single 8mm made of a rusty mix of metal (bolts look inox) and may be changed by next team. Good downclimbing skills required for this canyon. 5-7hr in total.

2025-09-20 | MirkoT | |🕮 |⚓ ★ | ≋ Normal | 👍 Completado
The rappel of the upper part, from the most exposed double (now triple) anchor, is a perfect pitch with light rubbing and with a 60 you get right to the base. Lower part more horizontal, more aquatic and playful. We doubled or replaced 10 guns (put all 10's except one 8). There were pretty much only Cacace singles from 15 years ago, a couple of which were bent/broken. Approach of 1h40. Photo 1: upper part Photo 2: very deep puddle in the upper part Photo 3: rappel higher than the upper part Photo 4: corridor in the lower part (traducción alternativa)
