Resumen: (traducción alternativa) varied - jumps, slides, rappel, climbing through tree stumps. Partly it looks wilder than it is. Pools often only very shallow!		
Hidrología:		
Acceso: (traducción alternativa) Directly to the Haldensee. Choose the parking lot for Tauscher's Alm or Naturcamping at Haldensee as your destination.		
Acceso: (traducción alternativa) From the parking lot, cross the bridge and then follow the path to the right. At the slide brake or shortly after at the small bridge the water level can be checked. Then continue uphill first on the hiking trail, then on the forest road until it crosses the Strindenbach stream at a bridge.		
Recorrido: (traducción alternativa) The first third to the A27 relatively open with small slides or possible jumps in rather shallow! pools. The canyon then becomes more incised and offers after the 27m rappel still very nice steps with mainly flat pools. At high water levels can be used at a critical point in the last third redirectors for rope traverses to avoid the water. The anchors are drilled here quite high and may be more difficult to reach from below.		
Regreso: (traducción alternativa) After the brick slide brake (last rappel) walk a few meters further until you can easily exit to the right at a water intake on the left bank onto the access path.

The slide in front of the big rappel is now doable again, the tree trunk in the pool could be removed and a fixed rope is still hanging. (traducción alternativa)

Everything in order, upper pool, formerly accessible by jump, now blocked by two trees and completely covered with gravel. However, fixed ropes have already been installed. Photo shows the water level from the bridge. (traducción alternativa)
