Resumen: (traducción alternativa) Hard to imagine a now year-round dry canyon, but that's rappeling in two giant whirlpools (but the Rio Vero may have created them)		
Hidrología:		
Acceso: (traducción alternativa) From Barbastro in the direction of Alquézar. After about 20 km on the newly expanded A 1232 at the junction before the bridge of the Rio Vero (righthand side old arch bridge - beyond the bridge Camping Rio Vero) turn right and continue on the A 2205 via Colungo in the direction of Arcusa, Ainsa. The road now winds curvaceously northward. One crosses the Bco Palomeras Fornocal (8.1 km from Rio Vero - bridge) and reaches a few hundred meters further the Puente de las Gargantas over the Rio Fornocal. The route continues with many bends. After 15.7 km (from Rio Vero) we pass the parking lot for the access to the Fornocal), after 16.7 km we arrive at the parking lot above the Portiacha (From the road the slope left away to the plateau).		
Acceso: (traducción alternativa) From the car in the direction of SSW to the edge in the channel above the first rappel.		
Recorrido: (traducción alternativa) 2 larger rappels in an impressive setting. In between, another small rappel and a short walking passages.		
Regreso: (traducción alternativa) Still above the streambed of the Rio Vero, a path crosses along the slope to the north. In the bed of the Rio Vero up to the small dam. Then, keeping to the right, in an arc across the Argatin up to the parking lot.

Approach walk direct from parking lot Abseil 30m overhang / last abseil 37m overhang total departure on knees / Arrival Rio Vero climb upstream of the Rio, arrival at the moulin climb back up the path, passage via the Argatin departure (total time 30min) Total number of people: 8 (maximum in my opinion) Magnificent canyon, impressive abseils but with an incredible view (take time to admire the landscape on the descent), arrival at Rio Vero very complementary and enjoyable.
