<b>Resumen:</b> (traducción alternativa) Watery rappel canyon in granite with a south-facing orientation. Technically and physically more demanding than the parts above. If you are careful you can find some higher jumps.  Before the tour, be sure to check that the fixed ropes are attached to the bridge (on the side of the tunnel).			
<b>Hidrología:</b> (traducción alternativa) In 2017, a dam with water diversion was built after the first 6 abseiling points, which removes about 3/4 of the water volume.			
<b>Acceso:</b> (traducción alternativa) We leave the SS 33 (Gravellona - Domodossola), which runs up the Ossola valley, via the Piedimulera exit and head west on the SS549 into the Val d'Anza towards Macugnaga. After 20.5 km (from the SS33 exit), you pass through the village of Ceppo Morelli. 2.2 km further on, the road turns right up to the village of Mondelli. However, we continue on the SS549 for another 850 m and park our car for the exit at the bridge over the Rio Mondelli (small cars only). There is a fixed rope on the orographic right for the exit from the stream onto the bridge. Normal sized cars drive about 400m further through the tunnel and park in the large parking lot.  Then drive back and left up to the village of Mondelli (1190 m above sea level). At the exit of the road, we park the upper car in the parking lot in front of the village.			
<b>Acceso:</b> (traducción alternativa) If you switch the ascent of the Mondelli med. before, the access is as described there and instead of the exit at the bridge you continue the tour in the lower part.  However, if you want to make the entry to the lower part directly, follow the signs "Stabioli, Macugnaga" and you will reach the bridge where the exit from the middle part of the Mondelli is made.			
<b>Recorrido:</b> (traducción alternativa) 14-15 rappels in a partly quite narrow and watery descent. At the double step above the large block, a continuous rappel over 60m should be more pleasant than using the transfer. In 2017, a dam with water drainage was built after the first 6 abseiling points, which removes about 3/4 of the water. This has made the lower part of the canyon much easier. At the dam, you can exit to the right (cairns and unclear path).  At the last waterfall, make absolutely sure that there is no knot above the rope protection.			

**Regreso:** (traducción alternativa)

Only a few steps to the car if you have parked orographically on the left. Otherwise approx. 400m through the tunnel back to the car.

Everything was also tip top. Mega tour. Not much water at the moment, but all the more relaxed. Wolfgang's times fit well. Mega tour. Please check if there are ropes at the exit before getting in. Otherwise set up yourself before the ascent. (traducción alternativa)

The best part of the canyon, I would say one of the best canyons in Italy, continuous, technical but also playful and aesthetically unique! (traducción alternativa)

Everything I.O. beautiful canyon. Perfect as a full-day tour. Take ascent material with you to be able to climb up the bridge on the ropes. (approx. 5m) Check here before the tour whether a rope is orthographically installed on the right, if necessary attach one before the tour (traducción alternativa)

Automatisch importiert von Descente-Canyon.com für Canyon Mondelli (inférieur) Enchaîné après la partie médiane équipement ras, quelques beaux sauts à envoyer, la remontée au pont se fait via de vieilles cordes en place...Toujours aussi beau ce canyon...
