Cuerdas: 2x 40m

Resumen: (traducción alternativa)
Beautiful short canyon with a few medium-high rappels. Cut in the lower part.

Hidrología:

Acceso:

Acceso: (traducción alternativa)
1h on the closed road, 30 min up the mountain (see waypoint.

Recorrido: (traducción alternativa)
Attention! Apparently, manual and automatic flushing takes place almost daily. Be sure to report this to the power plant operator!

Note on descente-canyon.com: "4 km2 large catchment area with firn, but a water intake 200 m before the start of the canyon takes almost the entire flow. This water extraction is manual, the desilting takes place about once a week during the snowmelt and only occasionally thereafter. The safest way to enter the canyon seems to be to leave a note at the water extraction point stating the day you enter the canyon, the time and any other information you find useful, and to remove the note after your descent. This way, the people making the entry will be informed."

A pleasant little canyon in the undergrowth. First some small obstacles to get to the two large waterfalls C30 and C25. Then you find a very nice little indentation, then a few more waterfalls and it's the final C18.

Regreso: (traducción alternativa)
Leave RD to get back onto the path and then onto the road.

Positively surprised, have added 4-5 anchors, some downclimbs would have been quite exposed. (traducción alternativa)

Primer descenso: 25.08.2017 en Mélanie Marti, Matthias Holzinger, Thomas Guigon und Andi Senn.
