País: Österreich / Austria Región: Salzburg Subregión: Bezirk St. Johann im Pongau Ciudad: Bad Gastein		
Dificultad: un poco difícil	Grado: v3 a4 IV	Tiempo total: 3h25
Tiempo acceso: 50min	Tiempo tour: 2h30	Tiempo regreso: 5min
Altitud de entrada: 1020m	Altitud de salida: 870m	Altitude delta: 150m
Longitud del cañón: m	Rapel más alto: 40m	Cantidad rapells: 8
Transporte: Coche opcional	Tipo de roca:	Zona de entrada: 35.00km ²
Temporada: julio - noviembre	Orientación: Este	Mejor época:
Clasificación: ★ 3.5 (1)	Información: ★ 2 (1)	Belay: ★ 1 (1)
Especialidades:		
Equipo: Cuerdas: 2*40		
Resumen: (traducción alternativa) A Tauern stream with some very beautiful highlights, but unfortunately also longer, arduous walking passages in between. Please note: there is a power station above that is automatically regulated. The Angerbach has a relatively large catchment area. Only go after several days without rain and in safe conditions - not during the melting period.		
Hidrología: (traducción alternativa) Catchment area of over 35 km ² , with a discharge for a power plant that is automatically controlled.		
Acceso: (traducción alternativa) From Hofgastein drive in the direction of Bad Gastein. After the traffic circle 'Bad Hofgastein Süd' turn right at 'Café Schneidiges' and continue in the direction of Hartl. Shortly before the first hairpin bends there is the possibility to park 1-2 vehicles at the roadside. Alternatively, you can take a second vehicle to the Angertal lift station and start from there.		
Acceso: (traducción alternativa) You can either start from the parking exit or from the Angertal parking lot in the direction of Hartl. Above Hof there is a small path that leads to a pasture. Afterwards, the trail leads cross-country through the forest in a northerly to north-easterly direction		
Recorrido: (traducción alternativa) You start with a walking passage through difficult terrain (slippery, block climbing, lots of trees) to reach the first abseil points. This is followed by three beautiful rappels, all of which are shorter than 20 meters. On the last rappel, you can ideally slide down on the left side into a very deep pool. This is followed by another arduous walking passage to the next steeper part. This begins with a jump or a slide or rappel (a saw is recommended to clear the slide of obstacles). This is followed by another 4-5 rappels. The first complete ascent took place in 2021, and there have been no known repeats since. In any case, you should take sufficient equipment with you. Unfortunately, I no longer know the exact lengths of the abseils, but I estimate the longest abseil to be around 25 to 35 meters. I therefore recommend taking two ropes with a length of 40 meters.		
Regreso: (traducción alternativa) Get out on the right and walk a few meters across a private property to the car.
