A 100 m - rappel with "run-up".

Hidrología:

Acceso: (traducción alternativa)
Like Froda superiore:From Luino on the eastern shore of Lake Maggiore, take the SP 69 to Castello Castellveccana (9.4 km). We leave this road here and turn left onto the SP 7 - Via Galileo Galilei - in the direction of Nasca, Sant'Antonio, Arcumeggia. We now drive 1.9 km and come to a house directly on the right-hand side of the road. 200m further on the SP 7, a dirt road turns off to the right (http://www.valganna.info/phpBB3/download/file.php?id=5455&sid=f863e4b82142828d13c5222d5645bee5&mode=view). We park the lower car here.

Take the second car on the SP 7 in a southerly direction continuously uphill. We can see the 100 m high final waterfall of the Froda inferiore and after 2.7 km we come to a prominent left-hand serpentine. Here we park the second car, unless we intend an integral ascent of the Froda (see description of the Froda superiore!).

In the haipin bend a footpath goes off in western direction into the forest.we follow it and in about 5 min. we come to a footbridge (entry).

Recorrido: (traducción alternativa)
First downclimbs and smaller rappels until you reach the break-off edge with the 100 m waterfall. It is set up on the orographic right with several intermediate stands.

Regreso: (traducción alternativa)
At the foot of the waterfall we come to a wooden footbridge. Left here onto the hiking trail, we soon pass the houses of the hamlet of Casone Froda (394 m above sea level), continue north along the path, cross the river twice and, after the third crossing and another 600 m northwards, reach the SP 7 and our car at the bottom.

Automatisch importiert von Descente-Canyon.com für Canyon Froda (inferieur) In the upper part are a lot of trees, therefore we did only Inferiore. Nice but slippery (Quelle: https://www.descente-canyon.com/canyoning/canyon-debit/23250/observations.html)

Unfortunately, there are a lot of trees in the upper part (Sup.), so we only did the lower part (Inf.). Slippery, but beautiful. (traducción alternativa)

Done the lower part, from bridge to above the final waterfall, with people from the beginner course. Everything in order, added anchors on the last two points missing for additional security; flow normal, quite slippery here and there.

Mega beautiful rappel canyon. All stands tiptop. Make sure the rope runs well, especially on the last rappel - sharp edges! (traducción alternativa)

Sup. and inf. committed. Only at the beginning a run, then continuously downhill. Abseil follows abseil. If the water level is uncomfortable at the big cascade, as it was during our ascent, the dry but green belay is recommended. https://canyon.li/froda-18-05-23/ (traducción alternativa)
