Pays: España / Spain **Région:** Asturias, Principado de / Principality of Asturias **Sous-régione:** Asturias **Ville:** Belmonte de Miranda

Difficulté: un peu difficile	**Niveau:** v4 a2 II	**Temps total:** 3h20
Temps approche: 20min	**Temps tour:** 2h	**Temps de retour:** 1h
Altitude d'entrée: m	**Altitude de sortie:** m	**Altitude du delta:**
Longueur du canyon: 600m	**Rapelle le plus haut:** 33m	**Nombre de rapelles:** 11
Transport:	**Type de roche:**	**Zone de prise d'eau:** km²
Saison: septembre - mai	**Orientation:**	**Meilleur moment:**
Évaluation: ☆ 0 ()	**Info:** ★ 0 ()	**Belay:** ★ 0 ()

Spécialités:

Matériel:

Résumé: (traduction alternative)
Gully to be made after rainfall to carry flow. The possible return options are indicated, both crossing the reservoir and without crossing it.

Hydrologie:

Accès: (traduction alternative)
By the AS15 that goes up the Narcea river to approach the area of Tineo.
If we have two cars, just before the p.k. 26 we have a parking place on the left with a view of the reservoir.
We continue until p.k. 30,5 to the bridge of Tuña and we get into this road (AS310), where we will arrive to Boinás (about 13 kms), from here we will go up to Begega (Bixega) and we will park near the church of Sta Eulalia. Here we will leave the access car or if we only have one vehicle.
Another option of the return vehicle is to park by the central Cauxa river, detour at p.k. 11 of the AS310 on the left (see map).

Approche: (traduction alternative)
We will go along the track towards the mound, go around the crop fields towards the peak and go around them, without going up to the peak we turn right towards the riverbed.

Tour:
Ver topo

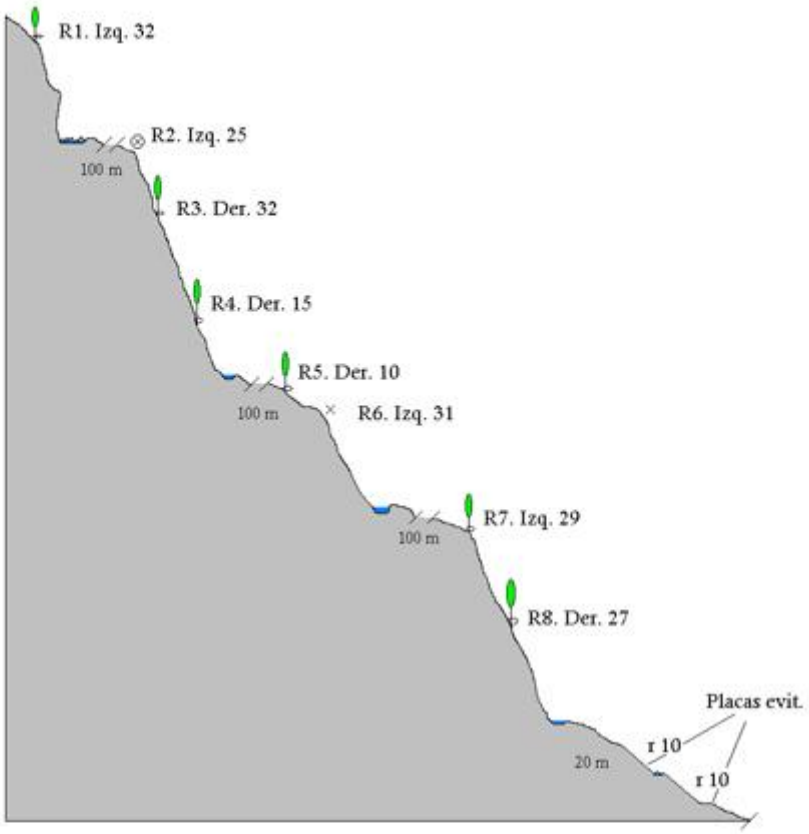

Retour: (traduction alternative)
We will arrive at the reservoir, we have several options:
1.- Cross by swimming, go up to the road where we will have the return vehicle.
2 .- On the shore of the reservoir go SW direction to the mouth of the Cauxa, we went up to take the track where we will have the vehicle.
3 .- We started on the banks of the reservoir heading SW until you reach an area with less vegetation where we begin to climb. We will go up this hard hill and when we reach the top we will see the high voltage poles on our right, we will continue climbing in that direction to take the track that goes that way. We go around the peak along the track and it takes us to the access mound.
