Pays: Schweiz / Switzerland Région: Kanton Graubünden Sous-région: Region Surselva Ville: Pigniu		
Difficulté: difficile	Niveau: v5 a5 V	Temps total: 7h35
Temps approche: 1h15	Temps tour: 6h	Temps de retour: 20min
Altitude d'entrée: 2330m	Altitude de sortie: 1450m	Altitude du delta: 880m
Longueur du canyon: 2500m	Rapelle le plus haut: 55m	Nombre de rapelles: 40
Transport: Voiture obligatoire	Type de roche: limestone	Zone de prise d'eau: 10.00km ²
Saison: octobre - novembre	Orientation: Sud-Est	Meilleur moment: 8-14 Heures
Évaluation: ★ 4.5 (1)	Info: ★ 2 (1)	Belay: ★ 3 (1)
Spécialités: Glacier dans le bassin versant,		
Matériel: Cordes: 2x 60m		
Résumé: (traduction alternative) Long tour with south-facing glacier, often only feasible a few days a year, and then with a fairly sporty water level.		
Hydrologie: (traduction alternative) Glacier that is in the sun from 7 a.m., several teams have already been surprised by strongly rising water levels at 12 noon.		
Accès: (traduction alternative) You can buy a 3-day ticket to Alp Sura for 10 francs. There is a QR code for Twint next to the no-driving sign. The road up is not paved and gets quite steep towards the exit. It is best to take a shuttle between there and the parking lot at the reservoir.		
Approche: (traduction alternative) Start early! Ideally, start at Alp Sura just as the sun rises (7:00). Follow the hiking trail for an hour, cross Gavirolas, and then another 10 minutes to the start of Fluaz.		
Tour: (traduction alternative) Superiore : Carries about half of the water. If you want to make inferiore, the part should probably already have ice, otherwise there is too much water at the bottom! Attention! As soon as there is sunlight, the rocks on the left and right thaw again and stones fall down, so superiore is not really recommended (do Gavirolas instead, which runs parallel). Inferiore : After the confluence it gets sporty, the gulches are occasionally interrupted by steep emergency exits. The first big rappel "The White Out" (about 50-55m) has very strong water pressure after 40m, but it flies over the last 6-8m. At 2024 you could then stand comfortably behind the beam in the pool below. So it's better to put more rope in the rappel than to make it too short, in the last third (except for the very last 5m) you can hardly see anything.		
Retour: (traduction alternative) Along the lake, there are usually hikers who ask you what you are doing with your equipment.		
Coordonnées: Départ du Canyon 46.8478 9.0734 Fin du Canyon 46.8355 9.0958 Parking à la sortie 46.8239 9.1112 Parking à l'entrée 46.8237 9.0956
