Résumé: (traduction alternative) Rappel canyon in limestone; only shallow pools; short beautiful tour; at the exit brittle access with old wire rope protection; good entry tour into the vertical; beautiful view.		
Hydrologie:		
Accès: (traduction alternative) From Bad Ischl you drive on the Bundstraße to the right in the direction of Bad Goisern --> in Bad Goisern further to the right in the direction of Hallstatt --> immediately after the bridge over the Traun (footbridge) turn right --> after a few meters you drive over another small bridge (Simple Bach) --> park here to the left next to the company.		
Approche: (traduction alternative) From the parking lot take the path on the right next to the brook up to the brine path (large power pole) --> cross the brook on the left and immediately after the bridge follow the steep path uphill on the right at the monument --> after approx. 20min. on the steep path you reach a power plant house (pipeline) --> here do not continue uphill, but without a large difference in altitude on the right. follow the tracks in the direction of the canyons --> after a short steep traverse incl. gravel gully you reach an old rusty steel rope (Attention!!!! fragile terrain, difficult access) --> follow the rusty steel rope to the entry in the canyon (Tip: with canyoning beginners you also have the possibility to rappel from a tree with a sling on the right about 40m into the canyon --> see topographic view).		
Tour: (traduction alternative) The canyon is very open with very good and clear abseils and shallow pools --> good practice tour to prepare for higher abseils --> mostly little water (in summer partly dry therefore better after rainfall). After the descent over the boulder field (upper entry) the first two rappels follow immediately --> left C8 and right C40 --> here you already have a nice view of the Hallstätter See --> continuous rappels follow --> right. C25, left C4, right C20 (narrow passage), left C7 (also bypassable), C5, C20, right C15, followed by the highest rappel on the right C45 (also divisible C25 + C20) to reach the exposed chain anchor on the right you rappel from the left about 10m. --> The last narrow abseil stage C10 follows in pools with old dilapidated water drainage.		
Retour: (traduction alternative) Walk in the mostly dry streambed to the bridge --> follow the trail to the left of the streambed back to the parking lot.
