Cordes: 1x40, 2x30

Résumé: (traduction alternative)
A typical Ticino route; rope installation is required at the exit!

Hydrologie:

Accès: (traduction alternative)
Drive into the Onsernone valley and then park at Loco.

Approche: (traduction alternative)
At the bridge, a trail leads up to the starting point on the right side of the canyon.
You must set up a (minimum) 30-meter rope at the exit of the canyon beforehand so you don't end up in the Isorno.

Tour: (traduction alternative)
At the beginning of the tour there are still a few exit options, but from the altitude of 520m you have to go all the way to the exit.

Retour: (traduction alternative)
After the rope ascent, follow the ridge until you are back in the village. You can walk through the well-maintained grounds (simply open the gate).

All stands OK. Little water today, so the water was never a problem. Unfortunately, there was always garbage in the river, otherwise clear, deep pools, but unfortunately hardly any jumps or slides possible. Better to use a 40m ropes to get out. Exit also possible via Isorno (upstream with 2 moderately difficult bouldering spots) at normal water levels. This saves you having to install the exit rope. (traduction alternative)
