Cordes: 1x35m

Résumé: (traduction alternative)
Rappel canyon with jumps and slides.
As far as the canyon leads over the area of the polit. This is the lower part of the canyon, which is prohibited. However, even before this ban was issued, this part of the canyon was generally not used. For the upper part, which lies in the territory of the municipality of Ayto de Mont-ral, a permit - https://www.feec.cat/actualitat/noticies/sactiva-un-nou-sistema-de-reserves-per-a-les-gorges-del-riu-glorieta/ - is required, which is issued by the FEEC. The quota is apparently limited. Details should be clarified on site.

Hydrologie:

Accès: (traduction alternative)
From the A 7, take exit no. 34 (Tarragona - South; Airport) to Reus (5 km). From here continue north on the C 14 to Alcover (14 km from Reus). We leave Alcover in a north-westerly direction ('Mont-ral') on the TV 7041. Before we have left the last houses of Alcover behind us, a small road turns off to the left to 'Ermita del Remei'. If you have two vehicles available, take this turn-off, pass the aforementioned 'Ermita del Remei' and park the lower vehicle in the terraced parking lot at the exit of the road (before the barrier on the left) near the large old mill; with the other vehicle (or if you only have 1 vehicle), take the TV 7041 up to Mont-ral. There we take the second tarred road that branches off to the left from the TV 7041 (signpost 'la Febró') and, keeping to the left, come to a restaurant and the (probably former) soccer pitch behind it. We park our (possibly second) vehicle at the western end of the field.
You can also park the only vehicle at the bottom by the large mill, but then walk the route to the exit and back twice (30 minutes each time), the approach from the top takes a maximum of 10 minutes and at the exit you can immediately take the path back up (but then with wet clothes - I still recommend it).

Approche: (traduction alternative)
From the western corner of the large square, heading SSW into the sparse forest, you quickly come to a wide path, which you follow to the right in a south-westerly direction. Where the path bends to the right after about 300 m, we follow the path that branches off to the left here. At a fork, a branch on the left leads steeply downhill (the footpath next to the Glorieta). We take neither this path nor the one straight ahead, but the one to the right, which after a few meters leads us to a bare rock slab, where the entry is via the left branch of the Glorieta. See also: http://www.descensodebarrancos.com/barrancos/glorieta/topo/mapa.html

Tour: (traduction alternative)
9 rappel. Varied. See photos and video

Retour: (traduction alternative)
After the large pool, into which you can make a high (approx. 13 m) pleasure jump from the rock face opposite the rappel in the chute (R8/S6) on the left, turn left out onto the path and then either up (only one vehicle and parked at the top) or down to the large mill.
