| <b>Spécialités:</b>   |   |   |
| <b>Matériel:</b>  |   |   |
| <b>Résumé:</b> (traduction alternative)<br>Generally dry canyon for collectors or days when the rest carry too much water. Access is equipped with clamps and cable   |   |   |
| <b>Hydrologie:</b>  |   |   |
| <b>Accès:</b> (traduction alternative)<br>From Reus by the C14 we will go to Montblanc, when arriving at Alcover by the TV7041 direction Montral. From Montral take the detour to Capafonts, before reaching the village at pk 21.8 we turn left to Font de la Llúdriga, soon a crossroads that we take to the right. We will see that the track goes to the southern part of the village and before arriving there is a track on the left. If we see that it is in bad condition we can park here. If we continue along the track we will have to be attentive to go up the track of the stream.   |   |   |
| <b>Approche:</b> (traduction alternative)<br>We leave the track in front to cross the ravine soon and go to the orographic right, the trail gets lost in some sections but with a little guidance we can follow it because it is only continue along the ravine. After passing through the landslide we will take the path to the left that goes up to the Grau de la Xota (there are wikiloc tracks to reach this point). Here we will have a cable and some staples to pass the difficult part. When we reach this area we will see to our right some oaks and large pine trees, we will go to the right off the trail in search of the cirque of the ravine. |   |   |
| <b>Tour:</b> (traduction alternative)<br>Without too much interest... a first 21m rappel and then a couple of shorter ones with several areas of climbing.  |   |   |
| <b>Retour:</b> (traduction alternative)<br>After the last projections we turn to the right to look for the access path.   |   |   |
