Matériel:
Cordes: 2x30

Résumé: (traduction alternative)
Rappel canyon with fun potential.

Hydrologie:

Accès: (traduction alternative)
Coming from Ivrea or Turin we approach the valley of Torrente Orco. On the SP460, passing Cuorgne and Pont Canavese, we go up the Orco valley to Sparone (about 4.5 km after Pont Canavese). We continue along the SP460 and then, 5.6 km after Sparone, we turn left and cross the Torrente Orco. After the bridge turn right towards Verne, Foere. 350m after the bridge over the Orco we come to the bridge over the Rio Vollungo. 50m further we can park our car on the left of the road for the exit.\n\nWith a second car we continue to Locana and there we turn left and go uphill towards Piane, Chironio. About 2.2 km from Locana, we come to a road junction where we turn left towards Chironio. We stay here on the right and head for Balmella and Pianema. Then, where the road for Pianema, Piandemma turns right, we can park our second car - about 50m before the houses of Balmella Inferiore.

Approche: (traduction alternative)
We continue walking down the road to the right past the houses of Balmella inferiore and down the slope to the stream. Here we can walk a few more meters on the right bank to the beginning of the gorge, where the entry is.

Tour: (traduction alternative)
About 20 rappels, many possible jumps and slides

Retour: (traduction alternative)
still under the road bridge and then out to the right, to the road and the car.

Coordonnées:
Départ du Canyon 45.3968 7.4675
Fin du Canyon 45.4098 7.4745
Parking à l'entrée 45.3999 7.4668
Parking à la sortie 45.4093 7.4741

This is the second time I've hiked through this beautiful canyon; it's always a lot of fun. We hiked the entire canyon, but in the second section, during the descent, we encountered the problem already described in another comment—namely, a large tree stuck in the last big slide. We managed the descent by standing directly on the tree's root. Given this issue, we recommend that only experienced hikers attempt the second section (in its entirety). (traduction alternative)

Automatisch importiert von Descente-Canyon.com für Canyon Vallungo Fait sans navette, on s'est garé à mi chemin, à Chironio supérieur. C'est une grosse bouse ! ! Seules les 15 dernieres minutes valent le coup, tout le reste est un chaos de blocs, moche, sale (poubelles, matelas), seules 2 ou 3 vasques permettent de sauter. Aujourd'hui, en plus, l'unique beau rappel (ou tob) de l'inf est obstrué par un arbre déraciné... Je ne comprends pas la note.... À moins qu'il ait été modifié suites aux crues? ?? (Quelle: https://www.descente-canyon.com/canyoning/canyon-debit/22937/observations.html)

A large tree, roots and all, has fallen across the final toboggan run of the Rio Vallungo. The tree completely blocks the toboggan run, making it impassable. We recommend doing only the upper section, exiting at the Romanesque bridge in Chironio. For those who also want to tackle the lower section, we recommend veering to the right before the descent leading up to the toboggan run. We are organizing a cleanup effort in the coming days to clear the toboggan run.

"Beautiful canyon with a unique environment, offering many opportunities for jumps and slides. Done in its full descent, it's definitely worth it."

Automatisch importiert von Descente-Canyon.com für Canyon Vallungo L'équipement est très bon et ne semble pas avoir été affecté par la grosse crue de cet été J'ai l'impression que les canyons orientés nord sont moins impactés que ceux au sud. Sûrement une question de bassin versant également.Tout passe parfaitement avec un débit correct à faibleNous avons dormi 3 nuits à la Ghita à Sparone, que je conseille chaudement (Quelle: https://www.descente-canyon.com/canyoning/canyon-debit/22937/observations.html)
