Résumé: (traduction alternative)
For Ticino a cold rappel canyon, can be combined well in one day with Ambra Sup.

Hydrologie: (traduction alternative)
North-facing, so the water is rather fresh.

Accès: (traduction alternative)
Park at the parking lot not far from the Ambra reservoir.

Approche: (traduction alternative)
On the north side, take the path along Ambra, then cross the bridge and take the forest path up along Bri.

Tour: (traduction alternative)
Some nice rappels, also smaller jumps possible (or 3-5m slides at the exit of the rappel). The narrow part at the end is nice, although too short.

Retour: (traduction alternative)
Exit again via the hiking trail at Cassinon 897, or continue with Ambra Sup. Between Cassinon and the confluence there are a few more slides and a nice 25m rappel.

Only went out late in the afternoon, nice canyon to have done once. It's usually not quite as dark as in the photos. Beware, stones can come loose in some rappels (if the rope moves sideways). (traduction alternative)
