ancre flottante,

Résumé: (traduction alternative)
Counts among the most beautiful and aquatic lime canyons in Austria; continuous rappel canyon with many rappelling points; very well equipped; several emergency exits; at high water levels, the canyon can be very dangerous; most rappelling points are directly in the watercourse; cold water; gr. catchment area + weir ; 3er cascade at the end; during shooting range operation, access is prohibited (times see links) !

Hydrologie:

Accès: (traduction alternative)
Coming from Spital an der Trau drive into the Drau valley in the direction of Tirol (Lienz) --> after the village of Oberdrauburg (after approx. 10km) at the sign "Schotterwerk Schmidl" turn left across the Drau to Lavant --> after 1.5km at the time sign from the shooting range drive back on the forest road to the barrier (parking lot).

Approche: (traduction alternative)
From the parking lot in front of the barrier of the shooting range (attention to red flag) it goes on the forest road to the small power plant cottage (700Hm) --> there you can already see the last cascade or the water level via a path that goes up on the left --> after the check back to the forest road --> follow this further to the only fork in the road Ri. Lavanter Alm --> after a short time and some Hm. can be descended at 940Hm simply in the stream (open terrain with views of the mountains).

Tour: (traduction alternative)
Entry at 940Hm --> from here it goes over a kl. Downclimb to the first step with cold shower:-) most of the (at the beginning still short) rappel points are in the watercourse --> the belays (mostly chain anchors) are however well and thoughtfully placed --> it goes very continuously over many rappels through the canyon --> in the lower part of the canyon come the higher rappel points --> the Frauenbach can change very quickly due to the partly very high water flow and debris, therefore the pools should be checked before a possible jump or slide --> in the upper third come several inlets into the canyon, (Tip: at the information board at the parking lot you can see the normal water level!) --> should the amount of water by the tributaries be too large for the walk, there are some emergency exits on the left side --> by the long stay in the cold water, the canyon should not be underestimated even on hot summer days. The last cascade C10-C30-C25 is very beautiful but can be very dangerous at high water (dry 40m rappel right possible)

Retour: (traduction alternative)
After the last cascade you get out of the stream at 700Hm on the left and go up to the power station house. Then follow the forest road back to the parking lot.

This was also chosen as Plan B because there was too much fresh snow on the Dorferbach. A truly beautiful route with absolutely no walking passages in between. All rappel points are perfectly set up, and there are alternative belay stations even for higher water levels. A must-do! (traduction alternative)

2026-11-01 | Joey CIA | ☆ ☆ ☆ ⯨ |🕮 |⚓ ★ ★ | 〰 Normale | 👍 Terminé
We did this as Plan B because Plan A wasn't possible due to the weather. Everything went well, the anchors were fine—a good fall hike. The three of us made it through in 1 hour and 45 minutes. (traduction alternative)

A very beautiful canyon. There’s a lot of loose rock inside, but it’s not a problem. You shouldn’t jump. (traduction alternative)

Inspection by the Styrian Mountain Rescue Canyoning Rescue Team. A very beautiful canyon. Lots of debris inside, but it wasn't a problem. (traduction alternative)

Awesome canyon! Everything went smoothly, but the conditions were very different from the description. Not much water today, and it wasn't slippery at all. Access: 40 min; hike: 2h15. No pools deeper than knee-deep; jumping wasn't possible anywhere. (traduction alternative)

Automatisch importiert von Descente-Canyon.com für Canyon Frauenbach Très belle course Les relais chainés sont parfois un peu haut et nécessite d'être précis pour les atteindre, sinon équipement OK (Quelle: https://www.descente-canyon.com/canyoning/canyon-debit/21881/observations.html)

2026-06-22 | Mathis van Ringelestijn | ☆ ☆ ☆ ☆ ⯨ |🕮 ★ ★ ★ |⚓ ★ ★ | 〰 Normale | 👍 Terminé
RAS. Very nice tour, definitely worth it. Normal water flow. Approach 30 min you need to have a good pace. Canyon can be done faster in normal conditions and with an efficient group ~1,5-2 hours. All rappels are numbered and correspond with the topo which makes orientation very easy.

2026-03-07 | Theresa Petschar | ☆ ☆ ☆ ☆ ☆ |🕮 ★ ★ ★ |⚓ ★ ★ | 〰 Faible | 👍 Terminé
No ice, somewhat slippery in places. Anchors in good condition. (traduction alternative)

2025-11-16 | Clarissa Linder | ☆ ☆ ☆ ☆ ☆ |🕮 ★ ★ ★ |⚓ ★ | 〰 Faible | 👍 Terminé
Currently very slippery. (traduction alternative)

beautiful canyon. Last hook was a bit tricky to get to , but all went fine :)

2025-07-14 | Theresa Pichler | ☆ ☆ ☆ ☆ ☆ |🕮 ★ ★ |⚓ ★ ★ | 〰 Faible | 👍 Terminé
At the moment there’s no deep pools, nothing jumpable at all. On the very last stand (25m) was a fixed rope already that looked like it was cut. Next one who goes down can take it out I guess.

2025-06-22 | Jason Walker | ☆ ☆ ☆ ☆ ☆ |🕮 ★ ★ ★ |⚓ ★ ★ ★ | 〰 Normale | 👍 Terminé
This is a truly pretty canyon, with great rock, slides, a jump or two, and heaps of abseils. The canyon is a bit of a bolt graveyard unfortunately with numerous smashed anchors left to stain the canyon for generations. The anchors that survive are fine, but could do with new linking material. Obviously this canyon gets very very high and violent at times (hence the busted anchors). Overall could do with a big makeover with strong unlinked glue ins, and probably needs any fixed ropes to be replaced annually... Super nice canyon to visit!

2025-06-22 | Holzer Johannes | ☆ ☆ ☆ ☆ |🕮 |⚓ ★ | 〰 Normale | 👍 Terminé
Have replaced a few hooks. Last step is drilled in again. Mfg (traduction alternative)
