Barranco Mantuba or Lomo Morín, next to Barranco del Salto and Cuevas Negras, in the area of Silos. Possibility of access by Cuevas Negras with a single vehicle but the hike is long.
Vertical but accessible, when we can do it with water is a real delight, since they channeled the water from above it is difficult to find it with a thread but after heavy rains we can have the opportunity.
Within the Plan Rector de Uso y Gestión del Parque Rural de Teno (PRUG). Permission must be requested at the cabildo

Once upon a time... the only canyon on the island with water all year round. The water supply has been interrupted for a year now and since then this canyon is probably also very often dry (traduction alternative)
