Résumé: (traduction alternative)
Above rappel canyon, mostly only standing water, below - after karst spring - comparatively long river walk

Hydrologie:

Accès: (traduction alternative)
We leave the AP-7 - Autopista del Mediteráneo, Tarragona to Valencia - shortly before reaching the Ebro and take the C-12 northwards to Tortosa (not quite 20 km to the town center). Once in the town, continue north on the C-12 towards Lleida. About 3 km after the town of Xerta (and 14.5 km after Tortosa town center), turn left onto the N-230b towards Gandesa. After another 7.2 km, turn left again onto the T-333 towards Valderrobres. Not quite 14 km after the last junction, we come to a T-junction where the T-334 turns off to the right in a northerly direction towards Horta de Sant Joan. However, we continue on the T-333 for another 270 m before turning left onto the road heading south towards the mountains (El Port). After 9.6 km (from T-333) we come to a kind of picnic area. About 1 km further on, we see "our" stream coming from the right. Here - immediately before the start of the ascent - we park our car, possibly the lower one.
With the second car (if the condition of the slope allows it) or on foot, we now ascend the slope. We reach a saddle at an altitude of around 870 m and drive/walk down the other side. We come to a water reservoir and park our car here.

Approche: (traduction alternative)
Immediately on the right, before the water reservoir, head north into the right-hand Canal D'Ulleres/Vall d'Uixó I (signpost).

But we continue along the track. It initially heads south, then after crossing a stream it walks northwest. Later it bends again towards the southwest. Immediately afterwards, as the path begins to descend again, we descend to the right into the streambed.

Tour: (traduction alternative)
First part (about 1/4 length) narrow, in grown rock, some - filled - pools; then (after joining the right Canal Uixo I) open streambed with plenty of water after a karst spring emerges.

Retour: (traduction alternative)
Where the stream meets the slope below the road at a perpendicular angle, out to the (lower) car.
