Spécialités:		
Matériel: Cordes: 2x 90m		
Résumé: (traduction alternative) Short but technical tour through the 40m shooting channel at the beginning of the 90m rappel. However, stones can be laid so that less water passes through the abseil channel.		
Hydrologie:		
Accès: (traduction alternative) From Bellinzona, take the road on the right bank of the Ticino towards Tenero and Locarno. You pass through the village of Sementina. Cross the Sementina here. Immediately after the bridge, turn right and park at the side of the road.		
Approche: (traduction alternative) Take the car back over the bridge and take the first road to the left. At the exit of the short road, follow the road directly to the left. At the next junction, keep left again and after three hairpin bends continue straight on for a short distance until you see a large house on the right (probably a water supply)		
Tour: (traduction alternative) Two mini rappels, then c90. Directly after this you can ascend again orographically to the left to make another passage. Caution: there is a sharp edge in the C90.		
Retour: (traduction alternative) Walk in the stream for about 30 minutes.

Automatisch importiert von Descente-Canyon.com für Canyon Sementina (inférieur) Done at night with full moon out. Very beautiful on the 90m rappel!! (Quelle: <https://www.descente-canyon.com/canyoning/canyon-debit/20680/observations.html>)

Done at full moon, cool thing to rappel almost 100m at night without a headlamp. (traduction alternative)

Anchors ok, in the 90 extreme cable pull especially in the upper range (without brake stage), short nice canyon (traduction alternative)

Nothing special to notice. Only the rope pull on the 90m is really strong at the water level so that you can easily let go of the rope at the top with the deepest friction level and it doesn't start to slide. Then it's a concentrated descent upside down. (traduction alternative)
