Saison: janvier - décembre	**Orientation:**	**Meilleur moment:**
Évaluation: ☆ 0 ()	**Info:** ★ 0 ()	**Belay:** ★ 0 ()

Spécialités:

Matériel:

Résumé: (traduction alternative)
One of the hidden wonders in the heart of the Cuencas Mineras. In this fantastic dry ravine we can see the evolution of the land and the transformation by the passage of water along its route. It is combined with the Hoz Mala

Hydrologie:

Accès: (traduction alternative)
Vehicle combination: We will leave the town of Aliaga towards the old Thermal Power Plant, in the neighborhood of La Aldehuela, at 3.5 km next to a sign of PRTE 10 Aliaga-Santa Barbara (30T 0696185, UTM 4506622), we will leave the car to return.
With the second car, we will return to Aliaga and inside the town we will take a left turn passing by the church square and heading towards Pitarque. We will cross a bridge and pass the campsite. Once we reach the top of the pass, we will pay attention to a track on the left with poor visibility, 5 km from Aliaga. Once at this point and 7 km from Aliaga, turn left and continue to a watering trough, corral and parking area (30T 269688, UTM 4505110).

Approche: (traduction alternative)
Once on foot, we will head towards the bottom of the ravine passing by a sunken farmhouse and continue descending until we reach the beginning (30T 0697731, UTM 4505265).

Tour: (traduction alternative)
First part without interest until reaching the rappels.

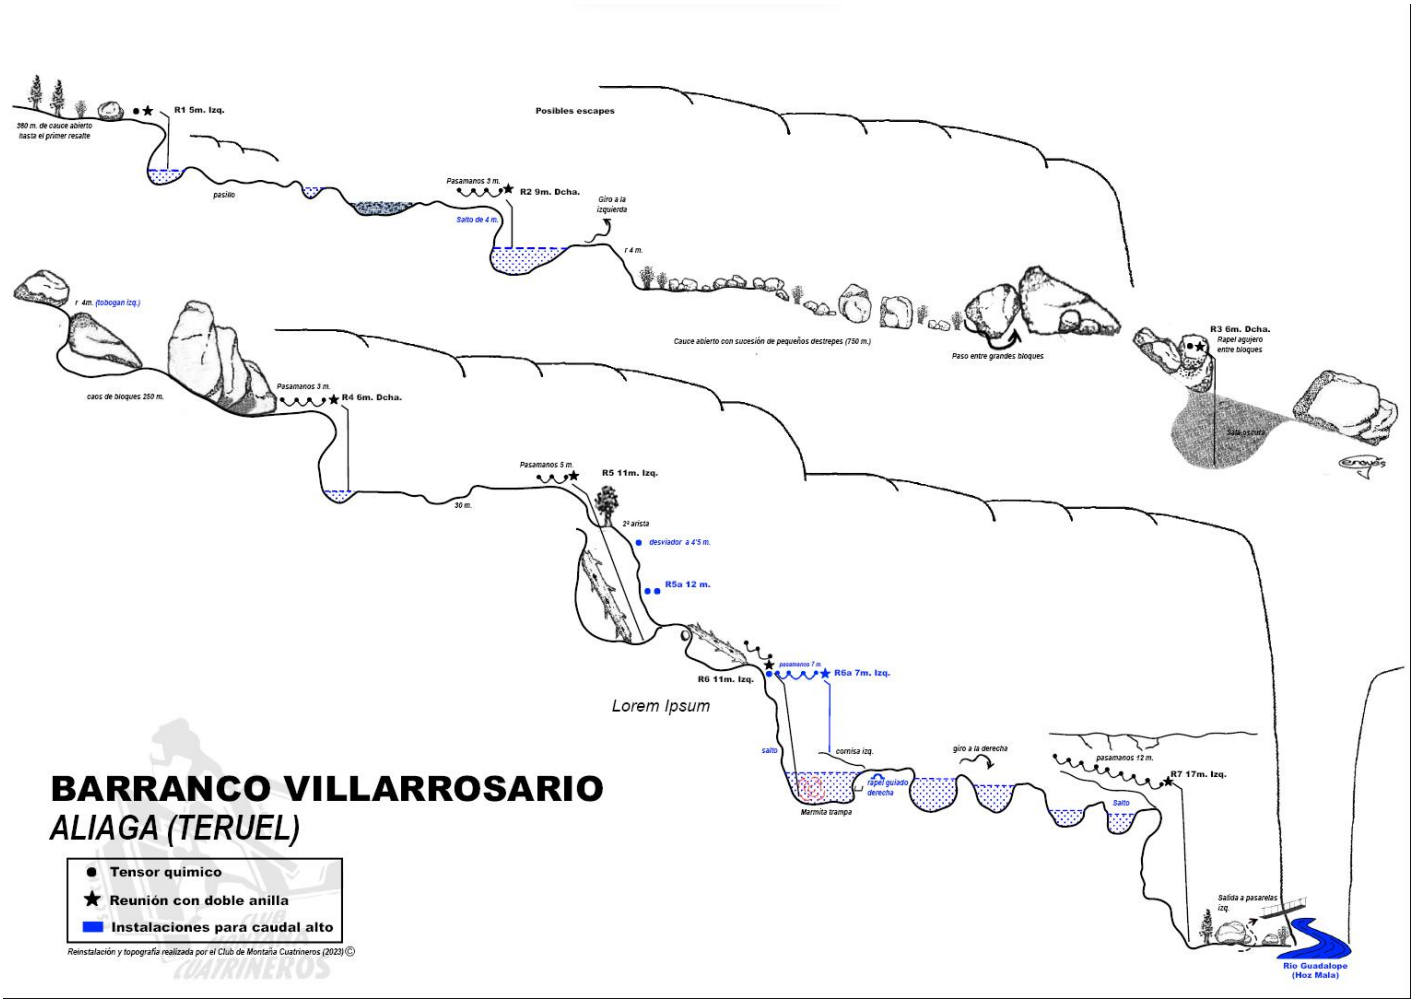

Retour: (traduction alternative)
We leave to the left (small ascent), following the cairns until we reach the base of the wall, which we will cross and continue along a small path, leaving the Barranco de La Hoz Mala to the right. Pay attention to the left to locate the exit for the ferrata. We will continue to our right and we will arrive at a small climb installed with rope. We will continue until we reach the Hoz Mala ravine that we will cross where the flow allows it. When we reach the dam, we will leave the power plant on the right and continue to the road, where we have the car to return.

Coordonnées:
Départ du Canyon 40.6727 -0.6610
