Spécialités:		
Matériel: Cordes: 2x 60m		
Résumé: (traduction alternative) Short tour; best time is in the afternoon; beautiful polished rock walls, dark pools, technically challenging abseils in the watercourse, some slippery spots, difficult exit.		
Hydrologie:		
Accès: (traduction alternative) From Biasca take the highway to Locarno --> take the exit to Lorcano Centovalli-Valle Maggia,-Onsernone--> continue towards Ponte Brolla at the bridge turn left over the Maggia to Onsernone--> at the exit of Cavigliano turn right on the winding mountain road to Loco--> at the end of Loco look for a parking place after the bridge (canyon) (few parking places available).		
Approche: (traduction alternative) After the bridge, follow the trail above the bus stop-->after the first switchback, a path leads down to the stream (700Hm)		
Tour: (traduction alternative) The Loco is up to the first exit possibility (shovel turbine) rather short, but beautiful and entertaining --> you have overcome the first small steps of the canyon comes already the highest rappel point (about 50m) which is located after the road bridge --> the stand is very exposed and is reached by means of a rope traverse --> there follow 2 short rappel and a slide, before you stand in front of the beautifully polished narrows --> here no way around! (rappel directly in the water course) --> after that there are 2 nice pools and a rappel point, where you have an exit possibility after the 2nd pool on the left (fixed rope) --> if you don't get out here, you have another rappel point -->the last few meters are rappelled before you stand in front of the small self-built paddle wheel --> according to the info, the 2nd (lower) part is not worthwhile, so we got out here (at about 510Hm). (Exit 1) --> if you go further there are more exit possibilities. Exit 2: Before the 45 m drop into the Isorno, Exit 2: rappel into the Isorno.		

Retour: (traduction alternative)

Before the last 45 m drop into the Isorno, there is a small old mill on the left (Exit 2). From here, a dilapidated path leads steeply up to the village in 45 minutes.

Another rappel option is to rappel down the last drop, then climb or swim approx. 600 m downstream in the Isorno to a footbridge and then climb up the path on the left. (Exit 3)

Be careful at Exit 3 through the Isorno. The Isorno has an automatically controlled water intake (+41 91 756 66 15)

Automatisch importiert von Schlucht.ch für Canyon Bordione inferiore / Loco, Wasserstand: "Wenig"

Verankerungen: "I.O." Unter der Brücke scheint eine Abwasserleitung kaputt. Dadurch ist der Bach ab der Brücke verschmutzt. Bei uns mehrere Personen mit Durchfall/Erbrechen. Bis auf weiteres sollte man nicht gehen.

Gemeinde werden wir informieren (Quelle: <https://schlucht.ch/schluchten-der-schweiz-liste/1100-bordione-loco>)
