Résumé: (traduction alternative)
The canyon part starts with a 25 meter rappel from a bridge. Alternatively, you can also enter the stream further up. There are still a few uninteresting abseils here. The start from the bridge is the highlight of the upper section. The canyon is largely open and an exit is possible at almost any time. Narrow sections can usually be avoided.

Accès: (traduction alternative)
From the Bregenz–Feldkirch highway, take the "Klaus" exit (the next exit after "Götzis"), then turn right (!) toward the roundabout; at the roundabout, turn 90 degrees to the left and continue southward parallel to the highway for about 1 km. Here, turn left and follow the sign for Dafins. Go under the highway; after about 2.5 km, cross Federal Highway 190 and continue eastward through the village area between Röthis and Sulz. Continue uphill to Dafins and through the village. Before the next leftward haipin bend (bus stop), turn right and follow the road for a few hundred meters until you reach a sharp right-hand bend (woodpile / greenery 2022). Park your car here.

Alternative: Bus (hike the entire Mühltobel!)
If only one vehicle is available, park it before crossing the Frödisch, then take the bus from Dafins Wanne (bus stop on the right after crossing the Frödisch) to Dafins Morsch (the bus stop described in the section above). Then, at the leftward haipin bend, take the right-hand road on foot and follow the approach directions.

Approche: (traduction alternative)
From the greenery/wood storage area, follow the road uphill to the next sharp leftward haipin bend. There we take the footpath that branches off at the apex of the hairpin bend and follow it until we come across a small stream. At this point, take the left-hand path downhill to the stream. The entry point is the Osang bridge.

Tour: (traduction alternative)
The highlight of the upper parts is the first rappel from the bridge (alternatively, you can continue up the stream without a route. There are still a few interesting abseils here. If you follow the stream from the bridge, there are a few low abseils, some of which can be downclimbed. In most cases, you can rappel next to the water or bypass the rappels.

Retour: (traduction alternative)
You can get off at the bridge before the c50 on the right up to Morsch. After a short ascent, you first reach a fountain, then a small cluster of houses. From here, follow the road to the parking lot.

I've completed all three sections. In the tricky spots, the surface is noticeably smoother again, even though the stream had surprisingly good traction this year. So far, nothing out of the ordinary in the upper section. (traduction alternative)

We hiked all three parts. Since we only had one vehicle available, we took the bus from Dafins Wanne (exit at the lower part parking lot) to Dafins Morsch. From the bus stop, it took us 15 minutes to reach the entry. The canyon as a whole offers almost frighteningly good grip, except for a few—naturally—predestined spots. The anchors are a bit older, but sufficient and in relatively good condition considering their age. A few are slightly rusty, as already described in a previous ascent. (traduction alternative)

All three parts done. Nice grip and all stands io. You can't jump anywhere because everything is quite full of gravel. (traduction alternative)

Low water level, no jumps possible. But otherwise OK. Two stands are somewhat affected by flash rust, but still good (traduction alternative)

The stands were fine and easy to reach. The entire upper parts were extremely slippery. (traduction alternative)
