Résumé: (traduction alternative) The canyon part starts with a 25 meter rappel from a bridge. Alternatively, you can also enter the stream further up. There are still a few uninteresting abseils here. The start from the bridge is the highlight of the upper section. The canyon is largely open and an exit is possible at almost any time. Narrow sections can usually be avoided.

Accès: Von der Autobahn Bregenz - Feldkirch auf der Ausfahrt "Klaus" (nächste Ausfahrt nach "Götzis") ab, dann rechts (!) zum Kreisverkehr, hier 90 Grad nach links und in südlicher Richtung parallel zur Autobahn etwa 1 km. Hier links dem Wegweiser nach Dafins folgen. Unter der Autobahn hindurch, nach etwa 2,5 km die Bundesstraße 190 queren und weiter in östlicher Richtung durch das Dorfgebiet zwischen Röthis und Sulz. Weiter hinauf nach Dafins und durch die Ortschaft hindurch. Vor der nächsten Linkskehre (Bushaltestelle) rechts abbiegen und der Straße noch wenige Hundert Meter folgen bis zu einem scharfen Rechtsknick (Holzstoß / Grünzeug 2022) Hier das Auto abstellen. Alternative Bus (Begehung des kompletten Mühltobel!) Falls nur ein Fahrzeug zur Verfügung ist, dieses vor Querung des Frödisch abstellen, um anschließend mit dem Bus von Dafins Wanne (Bushaltestelle nach Überquerung des Frödisch rechts) bis Dafins Morsch (im oberen Absatz beschriebene Bushaltestelle) fahren. Anschließend in der Linkskehre zu Fuß die rechte Straße nehmen und der Zustiegsbeschreibung folgen.		
Approche: (traduction alternative) From the greenery/wood storage area, follow the road uphill to the next sharp leftward hairpin bend. There we take the footpath that branches off at the apex of the hairpin bend and follow it until we come across a small stream. At this point, take the left-hand path downhill to the stream. The entry point is the Osang bridge.		
Tour: (traduction alternative) The highlight of the upper parts is the first rappel from the bridge (alternatively, you can continue up the stream without a route. There are still a few interesting abseils here. If you follow the stream from the bridge, there are a few low abseils, some of which can be downclimbed. In most cases, you can rappel next to the water or bypass the rappels.		
Retour: (traduction alternative) You can get off at the bridge before the c50 on the right up to Morsch. After a short ascent, you first reach a fountain, then a small cluster of houses. From here, follow the road to the parking lot.

We hiked all three parts. Since we only had one vehicle available, we took the bus from Dafins Wanne (exit at the lower part parking lot) to Dafins Morsch. From the bus stop, it took us 15 minutes to reach the entry. The canyon as a whole offers almost frighteningly good grip, except for a few—naturally—predestined spots. The anchors are a bit older, but sufficient and in relatively good condition considering their age. A few are slightly rusty, as already described in a previous ascent. (traduction alternative)

Everything OK. (traduction alternative)

All three parts done. Nice grip and all stands io. You can't jump anywhere because everything is quite full of gravel. (traduction alternative)

Low water level, no jumps possible. But otherwise OK. Two stands are somewhat affected by flash rust, but still good (traduction alternative)

The stands were fine and easy to reach. The entire upper parts were extremely slippery. (traduction alternative)

Almost all picks in good condition. Canyons very slippery overall (traduction alternative)
