For the first time we climbed the upper part and the lower part in one and replaced a few slings from the old stock. Walking passages after the 1st part to the entry into the 2nd part are relatively long, otherwise a really nice tour. It is advisable to take a few pieces of rope with you to possibly exchange some more old slings. (traduction alternative)

Today I climbed the upper part for the first time. Nice rappel at the beginning, partly brittle rock, then just longer downclimbing / stream hiking to the "known lower part". (traduction alternative)
