Résumé: (traduction alternative) Very beautiful canyon with emerald green cold water; very well equipped; €7,- for private mountain road; 1st part easy; 2nd part medium; 3rd part very long and demanding (pay attention to water level!); very nice and grippy gneiss and granite rock, most rappels outside the water flow, but the canyon as a whole is very aquatic!		
Hydrologie: (traduction alternative) Webcam with water level: http://www.valbodengo.com/d/phone/webcam.html		
Accès: (traduction alternative) In the village of Gordona you drive to the church --> on the left behind the church there is a café where you have to buy a ticket for the private road for €7,- --> then go up briefly on the right at the church --> at the fork turn left --> then sharp bend (at the fork) up on the right --> next fork turn left up --> follow the road (direction Pra Prince) --> at approx. 820Hm before a sharp bend on the right, there is a parking lot on the left --> take Boggia 1u.2 park here (for Boggia I you can park the car in the next village) after approx. 50m there is a motorcycle no driving sign (left) with signs Mulattiera per Bodengo and Strada Carrozzabile per Bodengo (this is the path where you come up from the bridge / way back).		
Approche: (traduction alternative) Stop or always along the mountain road, through the village of Pra Prince (920Hm)--> now it goes up for another 1 hour to a small chapel standing on the right side and left. a parking lot --> here you can easily get into the upper part (about 950Hm).		
Tour: (traduction alternative) From the parking lot to the already visible stream descend -->at the beginning small climbing passages, jumps and slides in emerald green water --> below the small bridge T6 in pools --> short R5 (li.) in small pools --> large pool with traverse rope (re.), fixed rope (r.) and ropeway (here you can jump from the right side (S6) or slide down via ropeway into the big pool...!!! pay attention to rope tension) --> walking and climbing passage ca. 50m --> le. bolthook with chain link R5 (le.) or E5 --> short swimming passage --< walking and climbing passage ca. 50m --> R6 (left), access via railing rope (T6) --> walking and climbing passage ca. 100m --> after the short walking passages on the left there is a striking boulder bent inwards which you go behind and on the left you take the way to the road (exit). (the exit is chosen to shorten an uninteresting stretch on the road) --> the entry to the 2nd part is after the small mountain village on the right over the road bridge of Bedolina (signposted parking Bedolina).		
Retour: (traduction alternative) After the striking inward curved boulder left follow the path to the road (approx. 910Hm).

Mega cool canyon! Very cold water in the off-season. Only did the upper part. Planned part 2 but not done due to cold. (traduction alternative)

Super nice section at normal flows. When we tried to descend earlier this year (after the massive rain) it was certainly a lot more water. Not a bad idea to have a rope to help people out of the eddy/kerwasser on the right side of the early slide! No water spilling over the waterfall at Bodengo 3 takeout.

We completed all three sections of Bodengo in one go. The low water level made the entire descent quite easy. It took us 8 hours from start to bottem with a team of 5 people. The anchor points were generally in good condition, though in Bodengo 3, finding them required a bit more effort. There are also fewer anchor points in this section, which sometimes necessitates climbing down. Fortunately, the rock provides plenty of grip. Overall, I enjoyed Bodengo 1 and 2 the most. The "Slide of Death" in Bodengo 3 was exciting, but there was also a lot of walking over large boulders, which made it a bit tedious at times. If I had to choose between the Bodengo Integral and Bares, I would go with Bares!

The cable car no longer exists at the large pool. It has been dismantled (traduction alternative)

Everything OK, towards the exit of the second part in the area of the access road (gallery) follow a yellow rope traverse on the right due to work in the stream. (traduction alternative)

We bailed out. The level looked fine, but made the third to fourth pitch on the topo too scary for us. We climbed back out the slab that forms the 6m slide at the start. Apparently the level was at, or above the normal commercial cut-off.
