Résumé: (traduction alternative) Varied tour with many pools at the beginning of the Resia Valley. Low gorges alternate with open passages. Depending on the level of gravel in the pools, higher jumps and slides are also possible.		
Hydrologie:		
Accès: (traduction alternative) From Resiutta in Resia Valley, turn right at the first bridge over the stream towards Povici. Drive through the small village, cross another bridge and keep right to the parking lot in front of a no-driving sign.		
Approche: (traduction alternative) Return a little on the road and turn left onto the marked 'Anello del Serai', CAI 743/b. Cross the Rio Resartico and on the other side ascend on a good path into a saddle and cross into the valley of the Rio Serai with some loss of altitude. After about 35 minutes, cross the stream above the last gorge, briefly follow the hiking trail on the other side to the north before turning left at a cairn onto a fairly clear hunters path (10m further on, the marked trail crosses a dry streambed). Follow the hunters path marked with cairns to the crossing of the Rio Broili, then continue up into the mountain forest above the low gorges of the Rio Serai. At a fork in the path, take the right-hand path. Entry at approx. 720m when you come out of the forest and can see the open streambed.		

Tour: (traduction alternative)

C13m from ring bolt left (possibly jumpable)

Downclimb and small slides in low gorge

C8m from ring bolt left

C10m from rope sling in the middle of the stream

C12m from ring bolt left

Escape possibility left, downclimb

2.5m jump

C8m from ring bolt left (possibly slippable)

C13m from ring bolt left

Downclimb (keep left)

2.5m jump

C6 from piton right (slippable)

4m jump (or rappel from tree on the right)

C23m rappel through the water jet from ring hook and rope sling attached high on the right

10min downclimb in the wide streambed until you reach the hiking trail.

Downclimb or 5m jump into a narrow pool

Start of a low gorge

C12 from ring bolt on the right or older anchor with chain link further right. Jumpable from 7m, 6m and 5m, slippable from the ledge on the right

C25 from bolt with chain link on the left, after 3m there is a deviation on the left

C10m from bolts with chain link on the left

At the end of the gorge, it is best to stay in the streambed for another 100m and at the exit of the landslide ascend right to the hiking trail (20m).

If you want to descend further in the streambed, long hiking sections and a very short narrow section with a 3m slide await the climber, not worthwhile from a canyoning point of view.

Retour: (traduction alternative)

On the access path back to the parking lot

A very beautiful high mountain hike. There were two of us and we had a very leisurely pace. The ascent took us 1:40 h and the canyon took us 3:40 h. Beautiful nature, nice abseiling and jumps. We liked it a lot. ♡♡♡ We didn't like only one bolt.. So we used other - higher ones. Thank you to the first ascents ;)

Two of us went hiking today. It took us 1.35 hours to get there at a leisurely steady pace. We spent 3.30 hours in the canyon. And the way back was 0.45 hours. Normally we are not that much slower. The only interesting part of the upper part for me was the last rope descent on C23. The lower section had 2 rope descents which, nice and interesting, but that was it. (traduction alternative)

I like the canyon very much, everything is there,.... jumps, slides, canyons, downclimbs, clean cold water etc... everything that makes a canyon heart beat faster. After the alternative exit, we continued along the canyon. Unfortunately there is only 1 more rappel, 5m was drilled in by GeorgB. Exit just before Torrente Resia, a popular swimming spot in summer.
