Évaluation: ★ 4 (1)

Info: ★ 1 (1)

Belay: ★ 2 (2)

Spécialités:

Barrage (informer l'exploitant),

Matériel:

Cordes: 2x 60

Résumé: (traduction alternative)

At the beginning nice rappels and big pools, very scenic. After a longer, blocked section, there are some more beautiful spots with possible jumps

Hydrologie: (traduction alternative)

A few hundred meters before the suspension bridge, the stream is tamed. The power plant operator must be informed before an ascent, as indicated by signs on the bridge at the exit.

Accès: (traduction alternative)

Drive from Locarno into the Maggia Valley and then turn left towards Locarno. After the bridge over the Maggia, turn right onto la Caraa di Gèir and follow the road to a meadow at the parking coordinates. Park there.

Approche: (traduction alternative)

Orographic right past La Scalèta, Capela ad'Lana, Capella del Pedro and Al Belvedé in the direction of A Castell on the hiking trail. Shortly before A Castell, descend to the right to the entry point.

Tour: (traduction alternative)

Some higher rappels with large pools are followed by a longer blocked section. This is followed by beautiful lower steps and nice pools.

It is possible to rappel from the suspension bridge after the water catchment and thus avoid the blocked section, but also the sporty first part.

Retour: (traduction alternative)

Turn right at the bridge and follow the road to the parking lot.

Rapports:

2025-08-12 | MirkoT | |📖|📌|★|★| |🌊 Normale | 🍏 Terminé

Installed double limb in the first rappel on the left and integrated three more belays. At the end of the first forcing (R5+T3 from Nizzola's book) there is room for escape routes on both banks. In this section of the creek there is a long walk/climb section about 600 meters long. Try to avoid the water as the wet rock is very slippery. Lots of fish fauna in the pools. The final forked section is worth the ride, although it is very slippery. (traduction alternative)

2025-06-20 | Christoph Cramer | ★|★|★|★|📖|★| |📌|★|★| |🌊 Normale | 🍏 Terminé

Two new anchors set, water temperature 17 degrees, anchors now OK. On the second rappel the anchor on the left is well hidden. There is a second anchor on the right near the tree. Very slippery in places. The anchor on the first rappel (stone in the middle) could not be tightened optimally, but held well. Check carefully before use if necessary. (traduction alternative)
