Résumé: (traduction alternative)
rappel canyon

Hydrologie:

Accès: (traduction alternative)
From Göcek to Elcik past the school, then keep right and take the paved road downhill to the left at the next junction. Go over a small hill and park at the next junction. There is only dirt road here.
Wikiloc track under Links.

Approche: (traduction alternative)
From the parking lot, follow the slope downhill and keep left at the first crossroads onto the worse slope, which you follow further downhill until you reach a better slope and follow this to the right until you reach a gate. Behind the gate is an inhabited house. During our ascent, someone was there and we were kindly asked to continue the access on a path to the left. The trail leads over terraces to the confluence of two streams, which marks the entry point.

Tour: (traduction alternative)
Various rappels mostly in the watercourse. You can usually avoid the water pressure. In the high cascade it is less possible to avoid the water, but without much pressure. The intermediate level is on the left.

Retour: (traduction alternative)
Stay in the stream until the ford, then turn right on the slope past the farm to the parking lot.
