Caution. The rope retrieval in the crux pitch is quite difficult and may result in a stuck rope, as happened to us. Local canyoneers confirmed us that this fact already happened several times. This is caused by the twisted profile of the abseil: after starting on the left, after a deviation point on the right, it makes a sharp turn to the left and finally goes to the right again. This rappel is the most thrilling with high waterflow. Besides this. Freezing water. Dress properly.

After the Ag. Loukas definitely the nicer canyon. Still slimy sediments and cloudy water, but the fact that is has so much water in October is awesome. With a lot of water I imagine this canyon to be quite difficult in some sections. Lots of jumps, anchors good, nice rappels, beautiful canyon.. what more can you ask for

Automatisch importiert von Descente-Canyon.com für Canyon Kaliteia Agios Loukas is also nice. 2 people, 2 h 45 for both together. Anchors are fine. (Quelle: <https://www.descente-canyon.com/canyoning/canyon-debit/22526/observations.html>)

Automatisch importiert von Descente-Canyon.com für Canyon Kaliteia Togheter with the upper part (agious loukas), 3 hours in total with 3 people. Normal flow, nothing difficult. (Quelle: <https://www.descente-canyon.com/canyoning/canyon-debit/22526/observations.html>)

Automatisch importiert von Descente-Canyon.com für Canyon Kaliteia Nous avons fait l'amont la veille pour repérer. Ça passe facile avec bon équipement hors crue. On attaque le lendemain la partie aval, avec un débit de l'ordre de 100 l/s. Le début passe bien, mais pas d'équipements hors crue, tout dans l'actif... Nous sommes sortis à 1/3 du canyon avant le gros encaissement, sans doute avant la C15 (pas simple de se repérer avec la topo que l'on avait été récup), par le biais d'une petite escalade puis en suivant un talweg... Ca passait sans doute mais au regard de l'équipement, de notre méconnaissance du canyon et du débit nous avons préféré sortir ... Automatisch importiert von Descente-Canyon.com für Canyon Kaliteia Le canyon n'a pas été touché par le méga incendie, par contre c'est la désolation autour...le canyon est magnifique et continu. Equipement ok. Retour sans navette env. 1h (Quelle: <https://www.descente-canyon.com/canyoning/canyon-debit/22526/observations.html>)

Automatisch importiert von Descente-Canyon.com für Canyon Kaliteia Did Agios Loukas + Kalitheas. Recommended. Lovely canyon! Good flow even in September although clearly spring would be a lot more sporty. (Quelle: <https://www.descente-canyon.com/canyoning/canyon-debit/22526/observations.html>)

Automatisch importiert von Descente-Canyon.com für Canyon Kaliteia This time with Agios Loukas, because Kalitheas was so nice. 2 Persons with a lot of photos 3h integral. The pists are ok mobil with scooters... (Quelle: <https://www.descente-canyon.com/canyoning/canyon-debit/22526/observations.html>)
