Spécialités:

Matériel:
Cordes: 2x70m

Résumé:
Fairly continuous stream, featuring a spectacular 65 m rappel (C65). Unfortunately, the final section is choked with numerous fallen logs.

Hydrologie:
The flow rate is usually moderate and does not present any issues.

Accès:
From Verbania, continue along the lake shore towards Cannobio on the SS 34 until reaching Cannero. In the village, turn left towards Trarego-Viggiona, climb up to Trarego, and drive into the village. Park where possible.

Approche:
Walk through the village center, pass the church, and continue along a small paved road climbing gently. Beyond the last houses, turn left onto a flat path heading towards the war memorial. Shortly, you reach the small bridge over the stream, the starting point. By hiking up a few dozen meters upstream, you can add a couple of small slides to the descent.

Tour:
Escape Routes: Just before the halfway point near a bridge.

Retour:
After passing the second bridge encountered during the descent, exit on the right, cross the bridge, and follow the trail back to the village (30 min).

So much water becomes quite technical in some places (traduction alternative)

Outing done on 3/26/2024, with medium/high flow, in fact the rappel from 65 was quite challenging, really cold water, that's why we came out mid stream at the bridge after the fourth rappel. For the return, follow the trail from the bridge to the village, in places passing between houses (traduction alternative)
