| Résumé: (traduction alternative) Rappel canyon with fun potential | | |
| Hydrologie: | | |
| Accès: (traduction alternative) Take the N 532 running parallel to the highway from Grenoble in the direction of Romans-sur-Isere to Rovon. Turn left here and take the D 35 via St. Gervais up towards Rencurel. The Canyon des Ecouges is also signposted. The road first leads up through sparse forest and finally crosses our stream on a bridge below the 65-meter drop. Park the car here. | | |
| Approche: (traduction alternative) Immediately by the bridge into the stream. | | |
| Tour: (traduction alternative) Highly frequented canyon, also popular after Ecouges I. Some jumps and slides. Water drainage at entry. Only permitted from May 1 to September 15. The third part (below the described exit) is generally prohibited. | | |
| Retour: (traduction alternative) After the C 13 and the adjoining pool, a path leads out to the left (signs in the streambed), which would lead down to Le Rez in 45 minutes. However, we do not take this exit, which would require a long shuttle, but continue along the streambed for about 70 meters. There, a (mostly dry) side stream descends in the scree on the righthand side. We now walk steeply uphill in the side stream, or better still across the grassy areas on its orographic right-hand side, until we come to a path. This leads in serpentine up to a slope, which we continue up (approx. 5 min.) until we reach the tarred road. Follow this road to the right for about 400 m back to the car. | | |
