Pays: Schweiz / Switzerland **Région:** Kanton Tessin / Cantone Ticino **Sous-régione:** Bezirk Leventina **Ville:** Lavorgo		
Difficulté: difficile	**Niveau:** v5 a2 IV	**Temps total:** 3h43
Temps approche: 10min	**Temps tour:** 3h30	**Temps de retour:** 3min
Altitude d'entrée: 960m	**Altitude de sortie:** 640m	**Altitude du delta:** 320m
Longueur du canyon: 650m	**Rapelle le plus haut:** 45m	**Nombre de rapelles:** 8
Transport: Voiture obligatoire	**Type de roche:**	**Zone de prise d'eau:** km²
Saison: mai - septembre	**Orientation:** Est	**Meilleur moment:** 9-13 Heures
Évaluation: ☆ 3.5 (3)	**Info:** ★ 2 (1)	**Belay:** ★ 3 (1)

Spécialités:
Barrage (informer l'exploitant),

Matériel:
Cordes: 2x50m/ 1x40m

Résumé: (traduction alternative)
Automatic weir system (danger of water surge!!!); usually little water in the canyon, but critical when there is a lot of water, so check the water level; call the power station operator; beautiful individual passages; vertical final section; slippery abseiling sections with some canyons; difficult emergency exit (left) before the vertical final section.

Hydrologie:

Accès: (traduction alternative)
From Biasca take the highway or the main road in the direction of San Gotthard --> if you leave the highway, turn off at Faido --> turn right in the direction of Lavorgo --> after 400m turn right on the main road --> cross the river and go under the highway --> at the exit turn left along the narrow road to the waterfall (park here on the gravel on the left!). If you come from the highway, after the village of Lavorgo, continue north until you reach the entrance mentioned above (which in this case is on the left!).
With a shuttle car you reach the narrow road (parallel to the highway) to the village of Nivo --> here continue along the mountain road to the first group of houses --> here on the right continue in the direction of Gribbio --> along the even narrower and steeper mountain road you reach a wayside shrine and 2 stone houses on the left side --> park here (approx. 1070Hm).

Approche: (traduction alternative)
From the houses, go right across the meadow towards the high-voltage pylons, where a warning sign and the descent path are already visible. From here, follow the path steeply downhill through the sparse forest to the weir at 960Hm. Check the water level!

Tour: (traduction alternative)
Arrived at the automatic water catchment (960Hm) you get over the railing with a short rope to the 1st stand (r) (If the water in the basin is already overflowing the canyon can become unpredictable) --> the canyon begins open with several rappel points of different heights and short walking passages --> the middle section begins with a beautiful chute in which you rappel 30m --> the following places can mostly be slid or jumped (Attention! on wood in pools) --> if you are not sure, it is better to rappel --> at the end you have a beautiful view into the valley --> here begins the most spectacular part of the canyon --> the upcoming ca. 150Hm are mastered in 6 parts; C10 (S8), C20, C36, R30, R38, R45 (good, safe rope technique are absolutely required here!) --> arrived at the bottom, the last boulders are downclimbed, before you stand on 650Hm in the streambed before the bridge.

Retour: (traduction alternative)
On the left side after the large boulders you will soon reach the parking lot (650Hm).

Coordonnées:
Départ du Canyon 46.4509 8.8209
Fin du Canyon 46.4528 8.8273
Parking à l'entrée 46.4486 8.8206
Parking à la sortie 46.4534 8.8276
Site de mesure du niveau d'eau 46.4531 8.8277
