Spécialités:		
Matériel: Cordes: 2x60m		
Résumé: (traduction alternative) Raw data import from Ropewiki https://ropewiki.com/Frunden_(West) A canyon with one of the best views imaginable. Still, there are some rappels in narrow parts, with fairly concentrated jets of water. (machine translated)		
Hydrologie:		
Accès: (traduction alternative) Park in Kandersteg.		
Approche: (traduction alternative) Take the gondola up, or walk (or ebike) to the lake. And then over the Fründeschnur towards Fründenhütte. At about 2000m turn right and head up to the plateau where both Fründen falls start. West is now established up to an altitude of 2140m.		
Tour: (traduction alternative) Again and again gulches in very beautiful limestone. The 60m does not look as high as it is from above.		
Retour: (traduction alternative) There are different variants depending on how far down you go.		
Coordonnées: Départ du Canyon 46.4873 7.7294

The canyon with the best views I've ever done, it's not so much the beauty of the rappels themselves (although some sections would be interesting even without views) but the surrounding landscape clearly visible in the open sections. Anchors a pi' scarce (traduction alternative)

Beautiful views, and beautiful gulches, but almost no water at this time of year. We have drilled up to 2140m, there would still be a step between 2180m and 2140m, which I think should also be achievable if someone wants to hang on. (traduction alternative)
