Avertissements:
Tirer la corde difficile
La recommandation est de partir avec au moins 2x80m et 120m (ou 20m + 100m), car sur les premiers 75m du 180, il y a pas mal de tirage de corde à cause de la mousse, et ce n'est pas facile de tirer la corde.

Cordes: 2x 100m

Résumé: (traduction alternative)
Vertical tour that is beautiful and can be done directly after the rain. Certainly one of the best rain streams in Ticino.

Hydrologie: (traduction alternative)
Small catchment area in the limestone, it doesn't take long for the water level to come down.

Accès: (traduction alternative)
In Melano there is a parking lot near the exit. Otherwise in Rovio at the top, but you have to climb 200m again after the canyon.

Approche: (traduction alternative)
Follow the hiking trail up to Alpe Melano and then join the trail at the stream.

Tour: (traduction alternative)
At the beginning there are many wide rappels, some of which are made from trees, after the 120m (30+90) waterfall it becomes narrower and very beautiful. At the final waterfall of 180m the following mass is currently drilled in (September 2025):
10m from the left
75m from the right (if necessary, there is also a stand on the right behind the free-standing tower to rappel down dry, but don't think about rappelling there, it will get stuck on the top of the tower anyway).
110m from the left (or swing 20m from the left far over to the right followed by 90m to the right)

Retour: (traduction alternative)
Follow the streambed for 2 minutes and then turn right onto the path.

Now the 180 has also been re-drilled. It certainly makes sense for the next ones to take an adjustable wrench with them to tighten the old anchors and also cut away the old connecting ropes between these anchors. (traduction alternative)

Drilled 15 anchors, unfortunately the battery ran out right before the big 180, so we went down through the forest (very steep, but you can get through without needing ropes). I have to come back again with 5 anchors, the intermediate pitches in the last waterfall are still missing. (traduction alternative)

Still a bit much at the moment, but I think it will be perfect tomorrow if anyone wants to venture in. But beware, it's adventurous terrain. (traduction alternative)

Cool creek, you will rarely have perfect conditions like it was today (200mm of rain about 24 hours before). However, the next group should definitely take enough anchors with them, some stands are missing on the big rappels, and some of them look very bad. (traduction alternative)
