Résumé: (traduction alternative) Watery rappel canyon. It is the first of four river stretches of the Estéron that are canyoned. Very frequented by commercial groups during the season. Not without danger during stronger water flow because of the backwaters.		
Hydrologie:		
Accès: (traduction alternative) From the valley of the Estéron we take the D 2211 direction St. Auban. Already before the village we park a car at the Maison des Services au Public de Saint-Auban. If we have a second car, we continue downhill along the left canyon rim and after a few switchbacks we reach a bridge over a side stream of the Estéron. A few meters later, we can park the second car in the open space on the left.		
Approche: (traduction alternative) From the bridge on the road first past the parking areas for hikers, climbers and fishermen at the site and left of the Esteron the road award.... Shortly after the tunnel at the break in the railing down to the right into the river.		
Tour: (traduction alternative) Although you can see large parts of the canyon from the road, it is a very sporty hike that is not recommended for beginners. In some places, the abundance of water leads to backwaters and backwaters. The highest waterfall (a few meters after crossing under a rope bridge made of 2 steel ropes) should not be rappelled at more than 500 litres/sec, although you can rappel through it and come to a halt behind the waterfall. A (not easy) switch from the right to the left side of the gorge is recommended here, as well as a traverse to the left around an edge and with several intermediate hooks and a tree to a sloping slab from which you can jump. A rope ferry is also possible here and is used by commercial guides. Incidentally, they only use the rope twice for the rappel.		
Retour: (traduction alternative) Where the canyon widens considerably and a side stream flows in from the left, follow the clear footprints to the left into the valley of the side stream and across a forest road to the parking exit.
