Pays: España / Spain **Région:** Aragón **Sous-région:** Huesca **Ville:** Colungo, Asque

Difficulté: moins difficile

Niveau: v3 a1 III

Temps total: 3h50

Temps approche: 20min

Temps tour: 2h30

Temps de retour: 1h

Altitude d'entrée: 715m

Altitude de sortie: 590m

Altitude du delta: 125m

Longueur du canyon: 800m

Rapelle le plus haut: 20m

Nombre de rappelles: 10

Transport: à pied

Type de roche: conglomerate

Zone de prise d'eau: km²

Saison:

Orientation: Nord-Ouest

Meilleur moment:

Évaluation: ★ 2.4 (2)

Info: ★ 0 ()

Belay: ★ 0 ()

Spécialités:

Matériel:

Cordes: 2x25m

Résumé: (traduction alternative)

Rappel canyon in conglomerate with the typical narrow places.

Attention: Since the 8 adjacent chutes of the canyons Lumos I,II,II, Alpán I (Medio) u. II and Trucho (left branch of Alpan II) are very difficult to navigate precisely due to orientation problems, it is best to take 2x25m of rope to meet all eventualities.

Hydrologie:

Accès: (traduction alternative)

From Barbastro in the direction of Alquézar. After about 20 km on the newly upgraded A-1232 at the junction before the bridge of the Rio Vero (on the right old arch bridge - beyond the bridge Camping Rio Vero) right up and on the A-2205 via Colungo continue in the direction of Arcusa, Ainsa. The road now winds curvaceously northward. You cross the Bco Palomeras Fornocal (8.1 km from Rio Vero - bridge) and a few hundred meters further you reach the Puente de las Gargantas over the Rio Fornocal (8.7 km from Rio Vero bridge). The route continues with many bends. 4.9 km after the Puente de las Gargantas over the Rio Fornocal - we are in the meantime on the back between the Fornocal basin and that of the Rio Vero - a runway goes off to the left diagonally. Here we park our car on the open space.

Approche: (traduction alternative)

We first follow the track parallel to the tarred road to the south. After 260 m it bends to the southwest. Either here or a few meters before, we leave the road to the right and keep to the left at the top of the cliff above the basin. We pass the first two recognizable (!) canyon branches (Lumos I and II) and the next one (Lumos III - left tributary). A longer stretch follows at the edge (cairns). The tracks goes around a rocky outcrop and swings to the south. We descend into the ditch, which is now below us, just before the next rock outcrop. After the rock outcrop, the descent would be into the left side barranco of the Alpan, perhaps already into the next canyon, the Trucho (orientation difficult!).

Tour: (traduction alternative)

10 rappels, narrows, "sala "s, small pools. Finally we are down in the collector, the lumos coming from the right. In this a few meters down. The canyon now makes a left bend at a right angle. Here (large cairn) we exit up to the right.

You could also "take" the following narrow section and climb out and up to the right after this.

Retour: (traduction alternative)

We get to the ridge above the Bco. and there we meet the path that - starting in Alquezar - now goes up from the Puente Villacantal (Rio Vero). This we follow, finally through some vegetation, up to the dirt road and our car.
