Résumé:
good alternative when all the neaby canyons have too high water flow

Hydrologie:

Accès:
On the SP1 bis (Lentiai - Quero), in direction Quero right after the gravel quarry take Via Molinello till the bridge on the river where you can park in locality Molinello, on the left side slowly after crossing the bridge.
With the second car, continue past the bridge on the dirt road for about 1 km towards Lentiai, then turn right onto a paved uphill road until you reach the church of Stabie.
Just after the church, turn right and continue for about 700 meters, keeping right at another junction, until you reach a curved bridge just before a farm (sheep breeding), where you can park the second car.

Approche:
Enter the canyon at the bridge where you park the second car.

To check the actual flow in the canyon, one can walk in from the bridge at the exit, past two sources. Currently the canyon is dry. Limited parking space.

Sufficient weapons (some hidden by much moss) including those from trees and in some unclimbs be careful. Cloudy water. From this point you can exit the upper part or enter the lower part https://maps.app.goo.gl/j1yzet8iDc6YNFwL6 Photo 1: first rappel Photo 2: rappel immediately after the 90° change of direction to the right about halfway down the slope Photo 3: the first of the two most beautiful rappels in the lower part Photo 4: the second of the two most beautiful rappels of the lower part (traduction alternative)
