Résumé: (traduction alternative)
Mainly open canyon with some nice passages. Suitable as a fallback option when other canyons (including Cuestis and Chiampeit) have too much water.

Hydrologie:

Accès: (traduction alternative)
From the south on the SS 13 Udine - Tarvisio after Chiusaforte you come to Vidali. Park here to the left of the road not far from a bar. 100m further on, the road crosses the stream, next to a small place of worship.

Continue north in the second car. After 500m (turn right towards Dogna), turn left towards Plagnis and Visocco. The road crosses 2 small villages and reaches the houses of Plagnis after approx. 2km. Here the asphalt road turns into a gravel road. Continue on this for approx. 400m until it crosses the stream. You can park in the streambed.

Approche: (traduction alternative)
Downclimb from the slope over rocks directly into the streambed.

Tour: (traduction alternative)
The rappel (max. approx. 35m) is mostly done from single anchors or rope slings on trees. Almost always could also be rappelled from trees. There are many emergency exits through steep forest. At the exit the anchors become sparse, but this is hardly a problem.

Retour: (traduction alternative)
Directly before the road bridge right over small scree slope or already before left.

A nice route with some downclimbs and a few rappels; the two longer ones are easy, and one jump was doable; some bolts were added or replaced, and the tree slings were all in good condition. (traduction alternative)

All good with bit of higher water level, some trees in the canyon.
