Spécialités:
Ne marcher qu'après la pluie,

Matériel:
Cordes: 2x20m

Résumé: (traduction alternative)
Forest canyon, which can be combined with a walk on the Maor.

Hydrologie:

Accès: (traduction alternative)
From Belluno on the SP 1 over the Piave river in a southwesterly direction, past Limana to Trichiana (12.7 km). In the center of Trichiana turn in (south) direction Passo San Boldo. After about 5 km we pass through the village of Sant'Antonio Tortal, then we cross Torrente Arda and after 6.35 km at Trichiana we turn left towards Campedel. On this little road we go in an easterly direction for about 1 km and then we come to the bridge over "our" stream. Before the bridge on the left place for the car.

Approche: (traduction alternative)
East of the bridge up the slope southward until you can descend without problems to the right into the streambed above the bridge.

Tour: (traduction alternative)
Lots of downclimbing, smaller rappels, occasional possible slides or jumps.

Retour: (traduction alternative)
Before the stream flows into the Torrente Arda, we climb up the small embankment on the right and head towards the banks of the Arda. We head up the Arda on a slope until we reach the top of the dam. From here, through the reeds to the west, we come to a path. We follow this uphill, leaving a track on the right and reaching a small clearing in the forest. At the south-west corner of this clearing, a narrow path leads slightly uphill above the canyon. At its exit, we come across another path that continues to climb steadily up to the road. We reach this at a small house. Now turn right down the road to the bridge and the car.
It is also possible, although not particularly rewarding, to descend in the Ardo to the Brent de L'Art. Before you reach the Brent Rizzo, there are four gorge sections with small swims and downclimbs. Between the gorge sections there are several steps that have to be laboriously climbed through bushes.

Automatisch importiert von Descente-Canyon.com für Canyon Scroa Armi ok. Circa a metà c'è un recente tappo di alberi e rami in cui si cammina sopra con attenzione. Tutti i vari tuffi fattibili rispetto ad anni fa in cui c'erano tronchi nel mezzo. (Quelle: https://www.descente-canyon.com/canyoning/canyon-debit/23031/observations.html)

Automatisch importiert von Descente-Canyon.com für Canyon Scroa Malgré ses 2km² de bassin versant, canyon en crue tout comme ses voisins.L'entrée semble s'effectuer par 1 rappel du pont.Même le petit canyon de tassere (zeland) était impraticable. (Quelle: https://www.descente-canyon.com/canyoning/canyon-debit/23031/observations.html)

2024-08-05 | CandyBear | ☆ |🕮 |⚓ ★ | 〰 Faible | 👎 Pas fait
The water level in the canyon is extremely low, so we got out after the second abseil. Stinking, stagnant water with lots of dead animals. Probably a canyon more suitable for spring or after heavy rain. (traduction alternative)

Little water and many trees. Some of the fuses are very old. We descended the Ardo as far as Brent de L'Ard and the Val di Botte. 4 gorge sections with climbing and swimming passages, in between walking terrain and boulder brakes that are difficult to climb around. (traduction alternative)
